Beginners Guide to: Sentry MBA

Sentry MBA is one of the most popular tools in the cracking scene. Getting familiar with Sentry will help you out buckets when it comes to cracking the important stuff. Sentry cannot do everything, but it can do a lot. Here's a guide to help you familiarize yourself with Sentry MBA.

Before moving on, I'd like to note that the config files presented here are not created by me, I'm sharing it as a resource for learning. Cracking against any sites listed here is on your shoulders, not mine. I do not crack myself, so don't ask me for specifics on help. I'm only providing an overview of Sentry MBA.

Prerequisites Sentry MBA v1.4.1 [\[here\]](#)

Sentry MBA configs [\[here\]](#)

Combo list or word list

Proxy list [\[here\]](#)

Familiar with cracking [\[here\]](#)

password

Code <http://lethemfind.us>

Don't forget, if you need to convert your combo list into an email list, you can use [\[this\]](#).

Some Additional Notes

Sentry MBA can be used two ways: with or without configs. Config files are essentially pre-made configurations for cracking specific websites or targets. Since Sentry MBA is a very robust tool, it can crack a handful of different authentication types & it is pretty powerful at determining fakes or hits. Since it is able to know all of this, this means that it is also required to have a pretty big chunk of info to get started on a site.

I won't be covering how to make configs in this tutorial, but I will show you how to load a configuration & how to crack with a pre-made config file. I should also note that you do need a config to crack (because I said earlier that Sentry can be used without configs), but you'll need to make it yourself on the fly.

Getting Started click "settings" on the left, then "general"

click "load settings from snapshot"

This will let you load up a config file, as mentioned earlier. Pick one from the configs you downloaded.

click "lists" on the left, then "proxylist"

click the open button on the right to select a proxy list to use

click "wordlist" on the left
make sure "mode" is set to "combo list"
click the open button to select a combo list
optionally, you could use the open buttons next to usernames & passwords to open their respective usernames wordlist and passwords wordlists

click "progression" on the left, then "progression" (underneath)
click the "reload list" (green refresh button) on the top right to reload your combolist (to ensure you're using the correct combolist, and not an old one)
slide the "bots" slider to an appropriate number of workers you'd like to use
click "start" on the top left

The main thing to pay attention to here, to determine whether or not we're cracking correctly, is the HTTP responses. These codes are essential to know if our requests are getting through okay. "Hits" are what we're aiming for. "Reds" are redirects. "Fakes" are, well, fakes. Sentry MBA if configured correctly, can determine when there is a fake response from the server - saving you time when cracking. "To check" is just the remaining amount of combos or usernames:passwords Sentry MBA has left to go through, with your wordlist.

This should help you get an overall understanding of Sentry MBA, and should open the door to playing with it a bit (no pun intended). Get your feet wet with Sentry, and see if you can learn some more. Good luck!

JustAnotherUser - June 27, 2013, 5:53 pm

How do you make good combolist? I used a tutorial and it didn't work for netflix combolist.

TheEnd-cR - June 27, 2013, 6:25 pm

I've yet to write a good tutorial for making a good combolist. I will be soon though. For now, you can just find existing combos on the net.

JustAnotherUser - June 27, 2013, 7:29 pm

Thats the thing, there aren't many good guides on the net. They're all horrible & don't work well. I'll have it out in the next day or two.

Alright! That'd be dope! Could you pm me the link when it comes out? So I won't forget.

ProblemSolva - June 27, 2013, 11:43 pm

Sentry is a really good tool
Cracked alot of accounts with this
However making your own configs for it
Plus getting good fresh proxies is the hard part
Nice tutorial but i already knew this
Very good for people who are new with the program though.

MoneyMarkedJaguar - June 28, 2013, 5:04 am

Very nice [TuT] it helped me out with the basics.
Thank you and have a nice day/night!

I just posted a guide on getting your own good & anonymous proxies. That eliminates half the battle. Next up is writing a guide for making your own configs... which, unfortunately - is not easy in any way.

bengtsson - July 24, 2013, 7:47 pm

Where can I get good combolists? Would appreciate if someone helped

nostradame37 - July 25, 2013, 6:05 am

wow use ful thanks im new there an need my 10 posts

dubwub123 - October 21, 2013, 9:53 am

Thanks, helped a lot ????

unknownXXXX - October 27, 2013, 10:41 pm

Thanks for this tutoria;s man and for ur hard worki

Coleio - December 28, 2013, 4:37 pm

im confused you didnt designate what it was to crack?? i have a yahoo mail account i need cracked how can i specify that too the program.

pm please:)

Strategist - January 8, 2014, 1:38 pm

Thanks for the tutorial man this will definitely come in handy!

Ignitions - March 17, 2014, 6:46 pm

Thanks man great TUT it really helped

Tuna - March 17, 2014, 7:05 pm

This is backdoored, don't use it if you value your HF account. The guy who created this thread is banned if you need proof beyond my own word.

Do not download this.

imhomeless - September 5, 2014, 7:11 pm

toonah how would this be backdoored man?

BigBird711 - October 27, 2014, 2:15 pm
thanks for the post this will help alot

Payne - October 29, 2014, 12:34 pm
Posting here to read this later. Thanks.

r0ne - October 31, 2014, 9:15 pm
Looks like a nice guide.. will test later

s?h?u - November 2, 2014, 12:01 pm
thanks for this, might need this later :

lpw96 - November 23, 2014, 12:18 am
Good Tut bro keep up the HQ posts :)

Shinigami-san - November 24, 2014, 1:42 am
good tut on sentry mba for beginners

dalecooper - January 17, 2015, 11:46 pm

Hiya would that include yahoo accounts as well? If not, what's a better alternative?

c0br4 - January 23, 2015, 3:04 am
Amazing tutorial actually taught me a little about this program. Thanks +++

Dukati001 - February 1, 2015, 3:46 pm
I like this tutorial thanks, I appreciate it

leviathan666 - February 1, 2015, 10:56 pm
Im a little confused on a couple of things, forgive me but im a beginner.
Im looking to use sentry to crack one specific skype account, but from what ive gathered so far it seems as though it will just crack a random account?
Also my other question is attacking the site itself seems a little risky for a beginner like myself.
Should precautions be taken for using a Brute force method?
I would assume it would be easier to use a RAT/keylog but the chances of getting the victim to DL something would be slim. Your response would be appreciated!

Noobiedude - February 3, 2015, 1:38 pm
I downloaded each of these and this part here does not work for me- "This will let you load up a config file, as mentioned earlier. Pick one from the configs you downloaded."

KoolTubeHD - February 22, 2015, 7:24 pm

Whats the password for the rar? Great tutorial dude!

Nalgun - March 2, 2015, 9:19 am

Awesome tutorial, helped me out alot, thanks

theglide - April 27, 2015, 1:35 pm

thanks for putting this together. very helpful

carlock99 - April 28, 2015, 1:32 am

have someone some config file to try like fb or gamil configuration?

sauceboss1287 - April 30, 2015, 6:19 pm

Thank you for the TUT it was extremely helpful.

H4x0r_boon001 - July 6, 2015, 3:51 am

Good TuTorial :)))

Good job bro

SIM-474498 - July 10, 2015, 11:06 am

Whenever I hit start Sentry says not responding and after a while it says "A call to a OS function has failed" how do I go about fixing this? I'm running windows 8

MadNoobie - July 16, 2015, 5:15 pm

nice tut. knew the most of it from before but found some helpfull parts.

makis23 - September 20, 2015, 12:47 am

I don't know what I am doing wrong. I followed the tut but I don't see any progress. Can someone help me out?

Nice tutorial but i already knew this

Very good for people who are new with the program though.

I've exactly same configs, fresh combos but I'm still struggling to crack a single thing, can you help me out?

My Skype is lakshay_2108

Firex - March 20, 2017, 4:39 am

Nice tutorial!! Thanks TheEnd-cR

sweanswen - March 22, 2017, 12:01 pm

Thank you forthe tutorial

x4binode - March 22, 2017, 2:42 pm

Good tutorial for remind me of old things. Thanks!

TickleTurtle123 - March 23, 2017, 6:09 am

Hi, Im paying someone to create a working config for a low security website.

Will pay \$15

Inbox for details

philwill80 - March 23, 2017, 10:52 am

Nice tutorial, many thanks for the hard work

br1el - March 26, 2017, 2:00 pm

Where do i get good combolists from?

Kristtik - March 28, 2017, 6:39 am

Dude TNX! This help me a lot...

Mickeymonroe - May 6, 2017, 6:33 pm

anyone want to make me a config for a certain website and will talk ££££ if interest drop me an inbox and we'll have a chat very intriguing

indib123 - May 17, 2017, 4:15 am

Nice, Can this be used for server sided games? thnx

Hopsin - May 18, 2017, 2:30 pm

I am surprised that those pictures are still working. Thank you.
