Thread: [{Emissary} NET Update Video & Progress Report & Suggest Me New Features!](#)

Coding4Noobs - June 22, 2013, 7:17 pm

[Video: <https://www.youtube.com/watch?v=PGiJrO8R5e8>]

Hello Hackforums,

It's been a while since I've made a thread about the progress of {Emissary} NET ([Here was my last thread about progress](#)).

Anyways, some new major features in {Emissary} NET are the Malware Remover, Deep Scanner (Pictures Below), the Alert System, and Remote Desktop v2.

Deep Scanner: Spoiler ([Click to View](#))Code The Deep scanner built into {Emissary} NET uses memory scanning methods in order to detect and eliminate malicious applications. It is very quick and very accurate and removes a lot of common threats as you will see in the pictures below, including but not limited to, CyberGate, DarkComet, BlackShades and more!

Alert System: Spoiler ([Click to View](#))Code Do you run a business or have kids that often go to sites that they shouldn't? With the Alert System, you will be able to receive and alert anytime, a specific window is detected. Protect your children from online threats or keep your employees off porn!

Remote Desktop v2: Spoiler ([Click to View](#))Code Though it is not as quick as our v1 (which is still available!), it uses a slower and more stable method of capturing and transferring images. Remove Desktop v2 will allow you to stream clients with slower cpu's, gpu's and internet a lot easier then before!

Pictures: ([Click to View](#))

Deep Scanner:

Alert System:

Remote Desktop v2:

PurpL Kush - June 22, 2013, 8:39 pm

I think I was more interested in the song than I wish the RAT itself..
jkjk!

OT: This RAT looks very nice. Man, it's hard to choose either Legacylink or this one. They both look very good.

Coding4Noobs - June 23, 2013, 10:21 am

(Jun 22, 2013 08:39 PM)PurpL Kush Wrote: [\[CITE\]](#) I think I was more interested in the song than I wish the RAT itself..

Thanks, if you have any more suggestions just pm me.

`Ninja - June 23, 2013, 10:30 am

I love this RAT so much, been using it for AGES.

Coding4Noobs - June 23, 2013, 3:10 pm

(Jun 23, 2013 10:30 AM)Prefix Wrote: [\[CITE\]](#) I love this RAT so much, been using it for AGES. Glad to hear you enjoy our products, any suggestions ?

logging*machine - June 23, 2013, 3:34 pm

Maybe add a botkiller that kills all other RATs/bots on the computer except for yours.

Coding4Noobs - June 23, 2013, 3:35 pm

(Jun 23, 2013 03:34 PM)Sunlight Wrote: [\[CITE\]](#) Maybe add a botkiller that kills all other RATs/bots on the computer except for yours.

Apart from the deep scanner, we have the malware remover quick that attempts to remove anything suspicious in the app data folder, or thats in your startup. The deep scanner calls these detections heuristic detections.

`Ninja - June 23, 2013, 3:50 pm

When i use upload amd exucute. My slave crashes. Might be bug or just me.

Casual - June 23, 2013, 3:55 pm

That's strange, but any particular reason you are uploading and executing and not download and executing?

Banana_ - June 23, 2013, 8:55 pm

(Jun 23, 2013 03:50 PM)Prefix Wrote: [\[CITE\]](#) When i use upload amd exucute. My slave crashes. Might be bug or just me.

Be careful with that wording. I would prefer to say clients.

`Ninja - June 24, 2013, 12:00 am

Because I thought it would be easier.

Casual - June 24, 2013, 12:10 am

(Jun 24, 2013 12:00 AM)Prefix Wrote: [\[CITE\]](#) Because I thought it would be easier.
It's safer when sending files to your clients.

Use a site like the one In my sig (UploadJunkies), rghost, etc,. Ones that don't distribute your files.

Right click, and click download & execute, put the direct URL In and there you go.

At least that way the files not going straight from your PC to theirs, and causing Issues.

Coding4Noobs - June 24, 2013, 9:31 am

I'll look into the bug later today and see if there is anything wrong with my code that could cause it to crash. I don't think there is as it's worked for me, but never the less, I will check anyways and see what I can do.

Today at 3:00pm EST i will be doing a join me session for ES NET.

`Ninja - June 24, 2013, 12:06 pm

Another Bug: When you about to exit and it pops up with: if you want to fully exit press yes, if you don't press no. When I pressed no, it fully exited.

Coding4Noobs - June 24, 2013, 12:07 pm

(Jun 24, 2013 12:06 PM)Prefix Wrote: [\[CITE\]](#) Another Bug: When you about to exit and it pops up with: if you want to fully exit press yes, if you don't press no. When I pressed no, it fully exited. check your icons in the bottom right hand corner it went there.

M@ddox - June 24, 2013, 5:32 pm

Vouch: I got emissary for 6 months ago and this is the most stable and fast R.A.T in the world!!!

Coding4Noobs - June 24, 2013, 8:46 pm

ahaha, i told you it would ^.^

anyways Control Center join me session @ 3pm

`Ninja - June 25, 2013, 7:48 am

When is 3PM? Like how many hours away?

Coding4Noobs - June 25, 2013, 7:49 am

(Jun 25, 2013 07:48 AM)Prefix Wrote: [\[CITE\]](#) When is 3PM? Like how many hours away?
it's 10:48am right now.

So....

rounding this to 11...

4 hours

Ninja - June 25, 2013, 7:50 am

Ok so the same time as last night (for me).

Jibbly - June 25, 2013, 7:51 am

um i dont know do you have anti botkill or a rootkit? ;-;

Coding4Noobs - June 25, 2013, 9:34 am

(Jun 25, 2013 07:51 AM)Jibbly Wrote: [\[CITE\]](#) um i dont know do you have anti botkill or a rootkit? ;-;
we have process protection in {Emissary} NET which requires admin rights to kill the process.

Jibbly - June 25, 2013, 9:41 am

i want lite hmu in a pm.
We don't accept trades.

On thursday ill be doing another join.me session of {Emissary} NET

I might do the join me session later tonight at around 9PM EST and then one again tomorrow at 3PM EST to allow people in different time zones to see.

xSilent - June 27, 2013, 2:36 pm

If anyone has any questions, be sure to post. We will gladly answer any inquires.

Coding4Noobs - June 28, 2013, 10:13 am

There will be a join me session for ES NET, Control Center, and Quick Remover in 2 hours.

Rvaveo - June 28, 2013, 10:47 am

action.

I will be doing another online session tomorrow evening.

maplenerd - July 1, 2013, 7:56 pm

I think people aren't looking to buy RATs for "personal-use" (aka keeping kids off xxx websites)

I'd like it if you actually took those of and make it into a "real" RAT people on HF use...
and a feature id like is the option for the stub to be either .exe or .jar <3

christiano - July 1, 2013, 7:57 pm

what about reverse sock function ?

do we need bots without router to make sock or any kind of bots can be turned into socks ?

Coding4Noobs - July 1, 2013, 9:09 pm

It's fine, ill be doing a join me session later today!

mullinupp - July 14, 2013, 8:19 am

Hi i dont know if somone has aldready said this but features i would like to have is.

Clipboard manager

mute/unMute

Start/exit screensaver

Registry viewer with and/change/delete/create keys

and a windows feature like this <https://i.imgur.com/kXFuray.png?1>

is what i can come up with atm what i would like.

take care

xtreme07 - December 8, 2013, 10:04 am

Hey Coding4Noobs, I submitted a ticket on your site about a day ago. I need my HWID changed. Please get back to me as I need to use ES Net very soon
