Love them - They are brilliant for social engineering. Although you wont be able to get a reply by email you can then phone the person like a week later and say I am still waiting for your reply by email. They'll either say, oh I sent it or Oh I haven't got round to sending it yet. Then they will tell you what they were going to say via email ?

ken3009 - November 18, 2008, 7:53 am

but does this method send emails to the bulk folder and not the inbox?

I don't know if you have the same problem but I have tested it and it says: "Could not send mail.
Check the script"
