Thread: [Twitch Viewer Bot | Currently in developement!](#)

insVayne - June 23, 2013, 9:45 am

Hey!

I'm currently in the developement off a twitch viewer bot, I've tried with 15 viewers and it works fine - except the cpu :/

Anyone could help me out?
Making it in VB6.

Use threads, don't open the exe loads of times.

Yeah use threads instead of opening multiply copies of the exe, btw what are you using to "connect" to the server, is it with a webbrowser?

Currently trying different things to connect with, flash and webbrowser.

Completely new, for around 5-6 years ago I played around a lot with vb6 - I hope to get it back.

Does twitch even count the viewers if you use it with flash? Just wondering.

Good to know, do you know how to remove ads?

If everyone could try to download this html and running it - don't enter the twitch channel normally. Just spam enter these.

I'll try to figure a thing out.

Thanks.
