Why don't you tell us what language you just used and we might be able to tell you what language this was programmed in.

Fake. - April 10, 2010, 12:38 am

You realise that it's no longer the private version if it's public :)
and why does everyone say 99% FUD when FUD = FULLY undetected
and it'd be 95% UD if you used NVT.

n3m0 - April 10, 2010, 1:12 am

work great. tested on windows 7 and xp

youlose123 - April 10, 2010, 1:20 am

uhhh the HWID link is dead >.< re-up?

sikoplo - April 10, 2010, 1:34 am

thx !

I will test it

--Secret-- - April 10, 2010, 3:29 pm

Thanks man. This logger rocks, but how can i remove it from myself :x

UnknownEdition - April 10, 2010, 3:32 pm

There are free programs to know the source code, for not buy 30\$... ?

wiza - April 10, 2010, 7:19 pm

good job...

by the way i like the GUI

spiderhanu - April 29, 2010, 9:33 am

thanks for the logger. can i send u my HWID?

brucejje - April 29, 2010, 2:38 pm

Rocks.. works and tested.. For people who wonder how it works. Well obviously the stub.exe encrypts the file if iam right and the other .exe(forgot the name) is the builder.

That wil generate a "server" aka the file you send the victim which he needs to run. And it will e-mail it to you.

Works like a charm and it isn't detected on northon security scan(i tested it) and you can run it on a guest account and it will work :)!

cheers and thanks :D!

xZxGangsta457zXz - April 29, 2010, 3:22 pm

see i respect users like these that actually care if people can download the file or not, others are just all about the money.

Hackoff - May 3, 2010, 2:38 pm

you sure this works good we'll give a try

ziglet^ - May 11, 2010, 8:49 pm

Didnt work for me either.

thisishowwedo - May 12, 2010, 6:06 pm

Trojan is attached to the file :P

Ramlapa - August 30, 2010, 3:41 pm

Obiously theres a TROJAN on EVERY FUCKING THING ON HF. Why Isnt Anything Legit And Real Anymore?

crazytaf - September 1, 2010, 9:56 am

thanks it's very goodthanks it's very goodthanks it's very good
