Render doesn't blend in with the background. The whole thing looks plain. The text does not fit in.
5/10

BisualZ - June 24, 2013, 9:51 am

Yeah as I said it isn't something special but simple but I disagree i thing that the background stacks with the render.
BTW: thanks for the feedback dude!

Guys thanks a lot. Maybe you wonder why i am doigng tutorials if I am noob? Well this is the best way for me to understand things. By explaing something to others I know that I understood it. Thanks again!

That looks really bad, you should try learning how to use photoshop first before making tutorials.

BisualZ - June 24, 2013, 3:38 pm

Any feedback is appreciated. As I said at my previous post I have a reason for making tutorials. I don't really care if they are too bad!

Try using gradients, gloss, brush strokes, nicer text, nice font, thinking of a congruent color scheme.

It's a really nice video but you should tell people how to do the shortcuts you are using so the inexperienced have a better chance at staying up with what you're doing.

It also is really nice, but dull.

BisualZ - *June 25, 2013, 11:31 pm*

I got it I will try to add steps at the tricky parts ASAP.

Really simple, but I like it.

Maybe get a mic to talk, it makes tuts so much better for the viewer to watch.

Yes verry good video but post pics of the shortcuts so we dont have to pause the video ervy 2 minutes :'(
