Thread: [Download mp3 from this website](#)

**xmattyx** - June 24, 2013, 12:01 pm

I would like to download some mp3 that I can listen in streaming on a website, but I can't do that. I looked for a link in the code but nothing.

This is the link, there are 12 songs. <http://www.rockit.it/roccohunt/album/poeta-urbano/22977>

Try changing that to "download on," made the dl clickable for me (Not sure if it would actually download, I couldn't understand a word so I just closed tab)

You think changing the class design would make it downloadable ?

**xmattyx** - June 24, 2013, 12:20 pm

I tried to change that with firebug, the download button become clickable but it refresh page and download doesn't start

Oh wow. I just realised what I. Oh. Derp.

No I don't think that just to clarify.
