Thread: [free dos tool? home connection](#)

RisenJesus - June 26, 2013, 8:37 am

Hey, there's this asshole, who I let have console, because I have been talking to him for about a month, and I trusted him. When I gave him it, he ended up betraying me. And, grieving what I worked on for about 3 months. Now I want payback. I figured out his IP with a resolver, I just need a free dos tool. So does anyone know where I can get one? Thanks :-)

Im gone brah - June 26, 2013, 8:45 am

You can only use a DOS tool, and knock him down. If you got higher upload speed then his download speed.

But i recommend you to buy a stresser.

on-silo - June 26, 2013, 8:45 am

Theres a few and theyre terrible, but if you use the search function you'll find them.

Cletus Kasady - June 26, 2013, 8:47 am

Pm me, im sure i can help a fellow member out.

ariton - June 26, 2013, 8:52 am

Just get a DDoS tool and get some slaves. Use them together to attack your enemy, or simply get some shells or create your stresser...

Just don't pay for shit. If you need help, you can ask me.

Oak? - June 26, 2013, 8:53 am

I would recommend downloading LOIC.

Then enter the following address:

127.0.0.1.

You will have hit your target off for a while.

ariton - June 26, 2013, 8:54 am

127.0.0.1.

You will have hit your target off for a while.

There's no place like 127.0.0.1. It's your home. Your everything.

grechkev123 - June 26, 2013, 10:34 am

@RisenJesus, I think this is quit a shame although as Inclination told you if you want free tools you have 2 options.

1/ A tool working on your own computer using your homebox internet modem (which means you'll be caped by your own upload capacity which will be his download and if you're having a higher capacity then you'll BBQ his bandwidth (one of the DDOS attack)). You could also try a hping3 SYN flood which is very easy to make on your own but be carefull not to flood youself otherwise you'll

don't have anymore access to the internet for few moment (and becarrfull also with the IP spoofing if you don't want to be seen you may need to bypass some ISP restriction. => DOS

2/ Rent for as little as few bucks a DDoS with much more power and more or less 40-60 servers around 1 Gbps which will definitely BBQ him. For sure this is not free but so powerfull if you have IP/port to forward off course. You'll find lot's on details in this great forum

Definitely approving @ariton saying that 127.0.0.1 is really ridiculous :)))) (certainly a 13yo noob) as off course it's your loopback adress

Good luck !

JagganN™ - June 26, 2013, 10:41 am

Free tool? CMD?

I recommend you to buy Elyxa Stresser ?

Racr - June 26, 2013, 10:43 am

You want a free DoS tool? Here's one <http://sourceforge.net/projects/udpunicorn/>

RisenJesus - June 26, 2013, 11:09 am

You will have hit your target off for a while.

Yep, of course I'll be sure to try that..

:facepalm:

Oh and, I guess I will save up for a stresser. I don't know much about shells and such. Also, anyone know a host that's cheap, and good?

I would recommend checking out the following list for hosts:

<https://www.cloudflare.com/hosting-partners>

jakefromminecraft - June 26, 2013, 1:53 pm

I wisk i could find one too :(Ive been looking forever

Thank you sir, Apparently some people can understand a joke.

syrustkira - June 26, 2013, 3:15 pm

i can help you out pm me
prolly short ^^

rubbaduckiii - June 26, 2013, 4:07 pm

I can help you out, PM me. I want to try a stresser I just bought.
