Come on, this is so not worth the money.

OMARATION - June 28, 2013, 3:48 pm

Guys, this is only an addon-script for firefox. It's not an actual program.

You need post pics, videos, proof, etc...

Nonetheless, GLWS!

Well you should consider it. Fast transactions, no chargebacks and virtually everyone accepts it, also 100% anonymous.

You can make a wallet in 10 seconds at blockchain.info

If you decide to accept it LMK.

Purchased it because i didn't feel like making my own, but it doesn't seem to be switching over to the "Update Logs" tab so ofc its not working.

Halp pls.
