You're probably thinking what Hyper Forums is..

Quote:HyperForums is a community based on a lot of things.. Gaming , coding , computers , money and much much more! We aim to please the others , to help each other.. We aim to teach aswell.. So that others may benefit.. HyperForums was formerly Learn2aim, due to a few problems with the domain owner he decided to remove it and we decided to get our own , we will not be removing everything , all the users from the previous forum are still there , the posts , threads , upgrades and all are still there!

I am doing this contest to promote the forum..

The forum is within HackForums guidelines , we do not endorse hacking or have a section for it on our forum..
