Maybe posting the source will make more people trust you as you are a new user.

Also putting images in spoiler tags will make the thread easier to view.

**NETExplorer** - June 27, 2013, 6:40 pm

If you aren't releasing the source, this should be in the hacking tools and programs section.

If this actually works, good job on a first big project ?

**Im-Racist** - June 27, 2013, 6:51 pm

Proof possibly?

**Website\_Hitincreaseer** - June 28, 2013, 12:24 am

I have just tested this out and have found a few problems. The program locks to a position on the screen so you can not move it. Also you can not close it..

**Trollkarlen** - June 28, 2013, 2:32 am

Looks good but you should post the source! ?

**Sc?rf?c3\_** - June 28, 2013, 2:48 am

The only fact that the op Release something and disappear make me suspicious....

**Chris2k** - June 28, 2013, 7:17 am

Download at your own risk.

It won't work anyways since Adf.ly has a very advanced anti-proxy protection, and they can detect that your using a proxy instantly .

You know, learning to read helps tremendously. This thread is older than you. Also, These aren't hard to make, stop being a leech and actually try yourself.

**M?estro** - April 1, 2014, 2:55 pm

Why use a webbrowser, wouldn't it be easier to use a webrequest?

I ? reading all people asking for this old program.

PS, why did OP use adf.ly link if he had a bot to click his links. ?

**evarand123** - June 27, 2015, 11:26 am

how long did it take you to make this from scratch

**lakben** - October 28, 2015, 2:12 pm

The link does not work...I want this program

Get enough posts and message OP to see if he still has it. If he does, it'll likely not work.

Anyway, referrals don't belong outside the Referrals section. Closing thread.
