Internet Web Browser Programs

What are internet Web Browser's anyway?

Internet web browsers are software that allows a user to receive information from the internet and World Wide Web. People use to go to the Library to get information, but with the internet, there now is no need!

1. Mozilla Firefox

Download Firefox 3.6.3 [Here](#).

User Rating 10/10

-By far the most used Web browser on multiple Operating Systems. A few outstanding features include tabbed browsing, an integrated search engine and many add-ons of all types. This high-performance browser also has a massive selection of great customization features and tools to help you personalize your Web experience.

2. Google Chrome

Download Google Chrome 4.1 [Here](#).

User Rating 9/10

-Google has joined the Internet browser competition full force with a very impressive entry, Chrome. Google Chrome takes a unique approach to browsing the web, combining top notch features with speed, compatibility, and simplicity.

3. Opera

Download Internet Explorer 8 [Here](#).

User Rating 5/10

-Microsoft's current standard is Internet Explorer 8. This web browser outperforms its ancestors with tighter security, private browsing and a clean look. Internet Explorer is a good browser with great features. Additional features in version 8 make it even better and definitely worth your consideration.

5. Safari

Download Safari 4 [Here](#).

User Rating 4/10

-Safari is not an Apple exclusive anymore; the top-notch browser is now available for PCs as well. Safari provides the Mac look and feel in Internet browsing. It is complete with tabbed browsing that includes a save tabs feature. Safari focuses on being lightweight and non-obtrusive rather than customizable. Hence the sleek interface isn't bulky and the frame is only one pixel wide.

I believe Google Chrome should have a 10 out of 10, it's a lot faster than FF and the GUI is much simple.
