NOW; WEB SALE | VOUCHED & TRUSTED | BIGGEST HF WEB SERVICE?

[\[img\]http://s22.postimg.org/wmbhbkon5/signature.jpg\[/img\]](#)

Spoiler [\(Click to View\)](#)

ORIGINAL THREAD: <https://hackforums.net/showthread.php?tid=3413863> (Locked)

ORIGINAL SCRIPT THREAD: <https://hackforums.net/showthread.php?tid=3580075> (Locked)

I made a new thread and my original thread got locked due to duplication on this thread, I found out that this market might be the right marked. Look at the stats of the original thread:Spoiler [\(Click to View\)](#)

Welcome to my web development thread! I will be able to make pretty much everything from scratch with some time and decent salary to it. I respected deadlines and ensure you that deadlines will be hold!

This is an affordable web development section, all you need to do. Is either to post here or send me a PM with what kinda website you want, it can include Javascript, php, CSS3 (Also media queries), HTML5, JQuery, script set up, template set up, hosting set up, domain set up, sub domain set up etc... But take in mind that since this is an affordable website service you wouldn't be able to get me to code Facebook for \$200, hehe.

I will be using all necessary coding languages to make you the website that you have chosen, this doesn't need to be a copy or anything like that. All you need to do is to simply fill out what you want!

I can also add other stuff to the website like CSS media queries which will let me make the website to all devices. From that I can also add stuff like bootstrap, wordpress etc.. If you prefer this and want to work on your website in the future with it!

I will also be able to upgrade your website from scratch if that's what you were looking for!

WANT SCRIPTS INSTEAD?

Spoiler [\(Click to View\)](#)

This is the scripts I have:

Contact form builder (Generate fully working PHP forms online, easy and locked for you) - \$10 / IF install - \$10
Live icons (300+ Animated icons and generator) - \$10 / IF install - REQUEST
Ajax contact form (Fully working contact form, easy to install) - \$1 / IF install - \$10
Simple PHP shopping cart - \$5 / IF install - REQUEST
Donate and download (wordpress) - \$10 / IF install - \$10
Login system with admin panel, newsletter, registration etc.. (easy install) - \$5 / IF install - REQUEST

Any installs will be a plus upon the already bought script, which means that S (Script) will be added on X (Install).

ASK (PM) TOO SEE A DEMO OF A WISHED SCRIPT!

All these are premium scripts are bought for more than the price I listed here. If you are a web developer, these will be some great assets. If you don't know anything about web development, don't worry. They are easy to install and will include documentation or/and tutorial on all of them. PM for any buy! ?

Partner: [BumbleBee](#)

Thanks for taking your time to read this thread and for being you ?

Middleman? Only HF admins!

Profit made? \$3 450 +
Happy customers: 35 +

*TOS (Terms of service)Spoiler [\(Click to View\)](#)

When you agree to this service you will agree to the fact that you are paying for a cheap and good solution for the web development you want to be done. This service won't make exact copies if the customor wants something that is big in general, such as functions that Facebook.com has.

Remember that these functions require a whole team and a lot more than a few dollars for it. I will do my best and will charge a deposit before taking a job, deals could be done with the deposit. But I will require to obtain the charged deposit money if I've done my part and used time on the job. If the user don't get his files, he will be refunded. If the project goes over deadline he will be refunded parts of the deposit or charged for a lower amount.

I do not take any hour salary, just project salary. And I have the rights to obtain the money through my goverment. The money needs to be sendt as a payment for service through PayPal and need to have a comment which says: "I've succesfully received my product. I will not chargeback under any circumstances." If it's not sendt through a service through PayPal you will have to face the consequences by skipping PayPal fee's, cause I won't pay the fee's.

There is no other way to get refunded if you got your files with just some minor changes to what you orginally wanted, remember that when you come to me you will tell me an abstract idea of something you want to be done. I will make the idea into a reality ones, but that doesn't mean that it will turn out like magic unless you want to spend a lot more than what this service was orginally meant for.

I've refunded other people when I've missed the deadline or been unable to complete their purchased request:

Intellectus - January 3, 2014, 3:06 pm

(Jan 3, 2014 01:11 PM)Nille Wrote: [\[CITE\]](#) Where can i see some of the websites you made?
Here's some:

<http://runescapegiveaway.net/> (Not fully done yet) - Oldschool: <http://feelus.net/rsps/> (Not done at all, we're still working on the RSPS so we haven't even made a .jar for the webclient yet or added any other site. But I'm working on the drop rates page of the NPC's in game while programming the RSPS).

<http://www.bangsundlan.com> (Not fully done yet, the customer is still wanting function to the website. PS. I haven't screwed with the contact form but I'll fix that for him)

<http://www.webenhet.com> (My website which isn't fully done yet, I've added 'LÆRE' as an option which means 'learn'. Where Norwegians can read about web development, this part isn't done yet though)

<http://www.diggydig.com> (This website seems to be off and online all the time, which isn't my fault but rather the hosting's fault)

Nille - January 3, 2014, 3:42 pm

But I'm working on the drop rates page of the NPC's in game while programming the RSPS).

<http://www.bangsundlan.com> (Not fully done yet, the customer is still wanting function to the website. PS. I haven't screwed with the contact form but I'll fix that for him)

<http://www.webenhet.com> (My website which isn't fully done yet, I've added 'LÆRE' as an option which means 'learn'. Where Norwegians can read about web development, this part isn't done yet though)

<http://www.diggydig.com> (This website seems to be off and online all the time, which isn't my fault but rather the hosting's fault)It looks really great! Do you have a picture of the diggydig website?

No, but I can see if I can find one ?

Flopper - January 11, 2014, 5:16 am

Vouch for this user, great friend! :D

lajcik - January 12, 2014, 6:45 am

Huge vouch for Intellectus, well worth giving a try! :)

Intellectus - January 19, 2014, 8:40 am

I'm ready for new orders, please keep them coming. Order now and get it your web development cheap!

Infer - January 19, 2014, 12:51 pm

Could I see some examples of your work? Then I might order

<http://runescapegiveaway.net/> (Not fully done yet) - Oldschool: <http://feelus.net/rsps/> (Not done at all, we're still working on the RSPS so we haven't even made a .jar for the webclient yet or added any other site. But I'm working on the drop rates page of the NPC's in game while programming the RSPS).
