Thread: [Basic Password Revealer \(Chrome Ony\)](#)

Lightsout - June 29, 2013, 7:34 am

Just a Quick Source of a Program i Made About couple months ago, people wanted the Chrome Password Revealer So i decided To just make a thread about it.

ScreenShots:

[Application]

Spoiler [\(Click to View\)](#)

[Exported Text]

Spoiler [\(Click to View\)](#)

Virus Scan:

[Edit: Do not know why needed Becuase its a source but for the Super Suspicious People out there here you go...]

Link:

<https://www.virustotal.com/en/file/718953ad18ff7cc1293b92097b39bd5023365bea594e1a1c84c33886a6d1b68c/analysis/1372516216/>

[And Yes its gets detected by Ikarus as HackTool.MSIL Becuase it Grabs Chromes Passwords And Decrypts Them...]

Download [Source] :

Link: <http://ge.tt/8jVZiYk/v/0>

[I Know :(I Spelt Revealer Wrong Lol!]

"Already 4 Downlaods:D Thanks but try to post if you want :)"
That will be 3 skids and 1 person making sure the app is safe.

Lightsout - June 29, 2013, 7:47 am

you are wrong. i downloaded it just to see whos source he used. does that mean i have to post?
(NOPE)

download + posts = not shit.

tweety - June 29, 2013, 7:53 am

Format looks familiar, pretty sure your using stelt's source.

Lightsout - June 29, 2013, 7:55 am

Nope its RockingWithTheBest's Module1 & SQLightHandler

Trollkarlen - June 29, 2013, 10:11 am

Very Nice. Thanks For The Source Adam ?

Lightsout - June 29, 2013, 10:13 am

No problem, Thanks for the feedback :P

Madara-Uchiha - June 29, 2013, 10:20 am

Why only for Chrome?

Here is a way better Source, which steals all passwords from FireFox, Internet Explorer, Opera and Chrome, MSN and Yahoo:

<http://pastebin.com/dspX8ehc>

I do not own this Source, all credits go to the coders of this awesome snippet!

Lightsout - June 29, 2013, 11:08 am

Your browser is probably an newer version and the source is out dated.

Lightsout - June 29, 2013, 3:19 pm

yeah exactly this is an old source as i mentioned in the thread

Sought - June 29, 2013, 3:27 pm

Nice, I have the latest Chrome it still works, Helped me find a lost password.

ExaNet - June 29, 2013, 3:28 pm

Lol, you should've not released the source and have it where it emails you everyones passwords. ;)

SkyRider2 - June 29, 2013, 4:03 pm

You're pathetic, why would you infect the community. Also it wouldn't of worked, most people on HF know how to deal with exe releases even if they're fud.

TrackPro+ - June 29, 2013, 4:06 pm

Wow, awesome. I downloaded it, but from the screenshots, it already looks awesome.

This is shown because you don't have any saved passwords.

antondan - August 3, 2013, 1:42 am

I tried to run it but code had 2 errors. Both are because some variables where unassigned.
First: Dim Field_Size() As record_header_field
Second: Dim retVal As String()

Fixed the second one by adding = New String() {"s"}
Still got a problem with the first one tho. dont know what to do ^^

Most? On HF? WAT?

Almost no one here knows how to check files for backdoors.

Tip: Running in Sandboxie, Scanning in VT doesn't count as checking for backdoors, kinda.

CC_AnoN2 - August 3, 2013, 6:46 am

It looks good and thanks for sharing it.

th3-whit3-hack3r - August 4, 2013, 1:42 pm

Looks nice good job you did well :)
