Monetary - concerning money, finances

Cartel - group which shares business interest

From these two terms I formed the "Monetary Cartel" a group of people who have money on our mind. We do whatever it takes to become successful in the art of monetary gain.

Loyalty before royalty.

We are an exclusive group, and to join us you must be invited, we must all approve of you, and you must have many skills to offer to the group.

To apply for an interview please fill out the application format below and reply to this thread with it.

May I ask how this differ from the official monetization groups on HF? I would be interested if this group offered adequate resources.
