This WILL be awesome! Looking forward to reselling this on the BHW forum like last time, only this time I'm certain this will be a hit!

Yes, we charge 435.00 USD for lifetime. Think about the endless money-making possibilities you

have with this.

I'm not sure if I can manage to get it released before my holiday.

Still taking pre-orders. 10% OFF and 100% FREE ACCESS to the CLOSED BETA (meaning that your license time won't be spent throughout the BETA).

Beilinder - July 6, 2013, 7:39 am

If I buy this now I can start using the beta version?

Vazity - July 6, 2013, 7:57 am

Some good updates to the bot so far, very interesting cant wait for full release.

BoredWikipedia - July 18, 2013, 10:31 am

Any updates on this? Been quite a long time since we got one.

TGOD - July 18, 2013, 12:43 pm

Looks nice, but kind of overpriced imo.

GL with sales!

Vazity - July 19, 2013, 6:15 am

No updates for the moment as I am on vacation.
However a lot more features than stated in the thread will be made.

Cardinals - July 19, 2013, 7:59 am

What's the incentive?
i kinda have to agree with you on that.. i mean what are the odds that this tool is still useful 5 years down the road

Vazity - July 27, 2013, 2:07 am

A lot of interesting unique updates once I return from vacation.

Isidar - July 30, 2013, 3:09 am

So when is this going to be released?

Zagreus - July 30, 2013, 3:55 am

This looks quite useful. Purchasing it now, will post back with review.

Would you mind reading the announcement that I just updated today?

Think of it as you have free license time aslong as it's under development. ;)

Vazity - August 19, 2013, 7:03 am

I'm happy to announce that the YouTube bot of the software has been fixed and is now available for use again. Development can be re-capped on other features now so we can get the bot done closer to completion.

Awesome tool, should be even more awesome when finished! By the way, the proxy system isn't working properly. Isn't there a super high chance of getting all you accounts banned without that?

The proxy feature is working, timeout checking just haven't been implemented yet. :)

Just released Comment Rater BETA btw.

Oh, but what means the error I'm getting? It doesn't work with proxies for me...

And that's what I was actually waiting for, going to check it out right now!

Most likely because your proxies are too slow which causes the error as there is no timeout checking. :)

Dan Smith - August 25, 2013, 4:36 am

Also, you might want to remove this:
