Weights less than my dumbbell, lolwat.

F?ction - July 1, 2013, 6:51 am

Oh nice, bet you can't wait to use it ^-^

What will you use the computer for? Everyday use, or gaming. I can find you a better deal than PC World.

I have already paid for it mate. thanks anyway.

I have a monitor and everything else needed for it so I don't see why I wouldn't.

Gaming or casual?

If it's for gaming, I got some bad news.

iElement - July 1, 2013, 6:58 am

Why would you buy a pre built?

You can get a full gaming or a better performing casual computer for that money.

That shit will slow down in a few months time and then you may feel stupid.

swagster - July 1, 2013, 7:01 am

Buying a prebuilt computer isnt good remember that till next time

Dastoks - July 1, 2013, 7:01 am

why didnt you made a build yourself? you could have gotten a better one for cheaper..

Cores - July 1, 2013, 7:12 am

Cancel it if there is still time left. Should build your own. It's not that hard.

Aesthetics - July 1, 2013, 7:30 am

You bought a i3 2220

Girlybitchyvoice: That is so bad ass omg.
sarcasm

Crawls in a hole and dies

Jire - July 1, 2013, 8:21 pm

All that hardcore Minesweeper you'll be doing with this...

Barrabas - July 21, 2013, 8:03 am

Haha, this is not worth calling a PC.
