Thread: [Semipilot] Probux method | $30 a day | Method in thread | mewle4

Latex™ - *July 1, 2013, 7:18 am*

Hey guys.
This is a tutorial on how to make lots of money on Probux.

What is probux?

Probux is a PPC (Pay per click) site that gives you money for clicking ads. It is one of the legit websites and one of the best PPC sites.

Method

What you need:

Mozilla Firefox
Greasemonkey
Probux script for Greasemonkey
Probux account

First install Greasemonkey from this link CLICK*.
Then restart Firefox and install this script *CLICK and restart Firefox after installing the script.

Now go and register at probux (please use my refferal link to support me) *CLICK*. When you register just click View ads and the bot will do everything for you.

When you reach $0.60 (Should happen in few day if active) go to Rent Refferaks and buy 3 refferals. The stattistics should be like this when you guy the refferals:
3 Rented Referrals x 6 clicks at $0.005 each = $0.09 / day
Clicking ads assigned to you, approx $0.09 / day
For a total of $0.18 / day.

[b]Then save up $2.00 and buy 10 refferals. That should look like this:
13 Rented Referrals x 6 clicks at $0.005 each = $0.39 / day
Clicking ads assigned to you, approx $0.09 / day
For a total of $1.29 / day.

Continue this untill you reach 200 refferals. When you reach 200 refferals you should save up money and buy golden account. Then you can have 1000 refferals that gives you:
= 1000 Rented Referrals x 6 clicks at $0.005 each = $30.00 / day
= total of $930 / month.

Just make sure you enable "Autopay" option to get the refferals auto renew themselves.

I hope this tutorial helped you guys. Please sign up under my refferal to support me. Thanks in advance. If you need help just PM me.
Spoiler (Click to View)The stats are without recycling refferals and if they all click the ads. But as you put Autopay option you dont have to worry about that problem.

;)

Good method but you should inform people about recycling as not all,referalls are active

Tomorrow - *November 29, 2013, 12:30 pm*
I'm going to give it a try. $1000 a month sounds really good..!
I'll post my results later on!

Thanks!

*EDIT: Your ProBux name is latexop, right? I had to put it myself.

*EDIT2: I don't think the script is working in my FF browser. It says that Greasemonkey and prubo script are on, but I don't ads being clicked. Am I doing something wrong?

Please help me out.

5107h - *November 29, 2013, 1:33 pm*
Hey ill check this out and use you ref.

dedric - *November 29, 2013, 2:45 pm*
why always making Probux guides but they all write the same.... Does anyone say the truth guide or how they do it?
I started on probux and now i have 1000RR. And the reason is you wont get more than 10$/day the least 12$/day the most with 1000RR cause the AVG is 1-2 clicks per ref. But i have another account with 100RR and 100DR and make 25$/week. pure profit. The greasemonkey script is java impament so it can make it traceable and it will make your account suspended.

PICwarrior381 - *November 30, 2013, 9:18 am*
Don't use a script, they will bann you...

k3rstman1 - *December 10, 2013, 11:53 am*
The script isnt doing anything? Is it blocked by the site or am I doing something wrong?

astro.rafael - *April 13, 2014, 1:43 am*
i just can't download the script..script please anyone??

m4cky - *May 17, 2014, 12:03 am*
can anyone post Probux script for Greasemonkey bcos userscript website it down please someone help :(

barryownt - *June 7, 2014, 12:09 pm*

The script link doesnt work anymore!
Please edit it to pastebin or something.
Thanks!
