Thread: [Dox Compiler | Quickly save dox info in one file | mewle4](#)

**Latex™** - July 1, 2013, 7:20 am

Hey guys

This is a python program from me that I will release on this site. Basicly it is a Dox compiler where you write stuff like first name, second name and that and it saves it for you in a .txt ( Make sure when it asks you for the filename your type .txt after you filename) file where your program is located.

[DOWNLOAD](#)

[VirusTotal](#)

You will need ( I think ) Python 2.7 installed on your system.

;)

**Hydra\_** - July 1, 2013, 7:48 am

Well, Nice try for ur first program I guess :)

**Compose** - July 1, 2013, 3:15 pm

```
Code print"  Dox compiler"
print"  Global Chao$ latex_op"
print" "
ime=raw_input("First Name: ")
prez=raw_input("Last Name: ")
nadimak=raw_input("Nickname: ")
datum=raw_input("Birthdate: ")
mjesto=raw_input("Adress: ")
mama=raw_input("Mother Name: ")
otac=raw_input("father Name: ")
email=raw_input("Email: ")
skype=raw_input("Skype: ")
msn=raw_input("MSN: ")
fb=raw_input("Facebook: ")
yt=raw_input("Youtube: ")
pp=raw_input("PayPal: ")
filename=raw_input("Type in the name of your file with .txt extension: ")
```

```
dox= ""
```

```
****Global Chao$ latex_op****
```

```
**Informations**
```

```
First Name: %s
```

```
Last Name: %s
```

```
Nickname: %s
```

```
Birthdate: %s
```

```
Adress: %s
```

```
Mother Name: %s
```

```
Father Name: %s
```

```
Email: %s
```

```
Skype: %s
```

```
Msn: %s
```

```
Facebook: %s
```

```
Youtube: %s
```

```
Paypal: %s
```

```
compiled by latex_op""""%(ime,prez,nadimak,datum,mjesto,mama,otac,email,skype,msn,fb,yt,pp)
```

```
file = open(filename, "w")
```

```
file.write(dox)
```

```
file.close()
```

```
print" "
```

```
print"You succesfully made a dox document about: ",ime,prez
```

```
raw_input("Press <enter> to finish the proccess")
```

```
Why not simply post the code here or on PasteBin?
```

If someone had a dox, they would simply copy and paste the text from where they got it into a text file. Or they would simply keep adding dox info to a text file instead of running a tedious program that asks for their input over and over and saves to a text file.

**clark.dll** - July 1, 2013, 7:45 pm

@Compose, he programmed it by himself and he's releasing it to us just in case somebody was interested. I agree with you, but he's just being friendly and contributing.

Thanks OP. Nice work.

**Latex™** - July 2, 2013, 12:37 am

It is one of my first programs and I just wanted to contribute to the community. Thank you guys. I will try and be better in future and make some bigger and better projects.

;) )
