Thread: [Odd jobs, marketing, selling, app support, ebook support, ANYTHING! Very very cheap!](#)

Jack Daniels™ - July 1, 2013, 6:57 pm

I am willing to work for you doing anything you require. I am very hardworking, and always strive to complete a job to the best I can. I am also very mature compared to some people on the forums. I am 18 years old and have lots of spare time :)

I am able to do the following (or anything else you can think of)

App support - Supporting your customers with queries and help.

Ebook support - Supporting your customers with questions and advice.

Marketing - I will market your product while you can sit back and relax!

Selling - I will sell your product for you - you don't have to worry about that!

Any odd jobs that you need doing quickly, by a reliable person! Hit me up now :)

I will offer my services very cheaply. With marketing and selling, I would probably base my payment as a percentage or commission. We could work something out that suited us both!
