Pm me if you want to purchase.

Current stock[14]

Warranty means that you will get a new server the first time your server stops working not that you will get new ones indefinitely.

The connection-speed of these RDPs is random. It could be a super-fast one! If you want to make sure you get such a RDP, buy a hand-tested for \$4 ?

Ok guys the requests for rdp's were much bigger then i thought. I am currently restocking on them so i'm not going to be selling bulk. I can still sell single ones.

dperry240 - July 4, 2013, 7:19 am

So I am still kind of new to this and I know what RDP's are, but I don't really know how people are using them for cracking, Bots, cpa offers, etc.. If someone could elaborate a little bit it would be much appreciated.

It is very easy. You are basically just logging into it.

What you'll see, is something like a normal Windows that you are running on your PC.

You can simply drag'n'drop a cracker (as a .exe-File for example) and run it.

Then you can logout and let your cracker or whatever program do what it's doing.

Fatality - July 8, 2013, 1:53 pm

Do you still have any of these? I would like to buy a manually checked English RDP.

BrianKush - July 8, 2013, 2:13 pm

Do you take wmz as a payment method?

HelpingOthers - July 8, 2013, 6:58 pm

I bought the \$4 package. The RDP worked great for few days until the owner started kicking me out.

I PMed yugurt and he will not reply back. I also got a French RDP when the \$4 package clearly states that I'll receive an English RDP! I'm waiting on yugurt reply to my PMs.

I must admit, terrible after sales and support by him (not by Syphox though)

Edit: The RDP even stopped working now.
