DarkBlaze

A Team Burning In The Dark

About The Team:

Currently DarkBlaze is a team dedicated to earning money and profit, by anyway possible. The team will (I hope) stand for Hacking, Cracking, and Teaching others. Atm it is just me, and one other person... Anyways If anyone wants to join up, that would be awesome. I have a few ideas for Operations and such, but I cant talk about any of them here. If you want to join, check the requirements below, and post in this thread or Private Message me.

Requirements:

Skype (Or Jabber, but I'd prefer Skype)

Some Useful Skill*

Time to actually work with the Group

*skills: E-whoring, Programming, SQL, Social Engineering, Something that is not pointless

BTW:

You have to be approved to join the group.

I will PM my Skype/Jabber/IM if you are accepted

Thanks for reading,

Grim?

EDIT:

Please post your Skills and Time Zone in this thread if you wanted to join.

I hope you know if you are going to discuss Hacking related terms through skype, it would be a bad choice as they voluntarily chose to participate in NSA's PRISM act.

Maybe an IRC would be the best way to go, GL!

Nuk3 - July 2, 2013, 9:35 pm

You should add that this is an un-official group.

Owen5000 - July 2, 2013, 11:03 pm

Skype: owen.r99

I dont have anyskills but Im a fast learner with pretty much anything computer related.

I have time to work with this (all summer)

Good luck with the group, OP.

I wish you the best for you and the members of your group.

Kind Regards,

Milf

Skype isnt for main chat.

The reason why I have skype, is so I can organize members efficiently.

IRC is used for main chat.

Pacific Time Zone

Skills as well as about me: I am a coder and Graphic Designer. I can make good looking websites. Also I have been progressing in hacking. It has just been a month since I have started hacking, and I already made a phisher (that isn't just a copy and paste) I actually made an original phisher. In a week I got over 15 peoples instagrams. Also I coded my own RAT in python, and made a java version. I also have good knowledge in Adobe Photoshop and have been doing graphic design for three years now. Although I am only fourteen, I am well spoken and mature for me age, this helps me with social engineering which I am getting quite good at.
