Thread: [An ewhoring method I thought of](#)

Twitchofexe - July 3, 2013, 11:27 am

What can I do with a unsaturated method for ewhoring that I came up with? I think its decent and I know its worked before.

Sell it if its really good and u are sure that nobody has ever used it before

How can I be sure? Its used but not as an Ewhoring method.

You should sell the method, or keep it to yourself.

If you plan to sell it, make sure you look around and see if there's any thing similar to your method. If you can't find it, then people will most likely not know your method.

Try the method, if it's working either use it or sell it. Or even both.

make some money from it....show the proof and make ebook for sell :p ..so that you can earn from ewhoring as well as ebook.

That's a simple question!~ ^^ I would personally recommend try out the method for yourself, gather proof that it does indeed work, write an ebook, then sell it.

However, another alternative would be to keep it to yourself if it truly is a good method that is unsaturated and can bring you the bucks. ^_-

Good luck!~ Glad you found a good method haha.

Use the method, make lots of money, then sell the method and make more money!
