Thread: [\[How-to\] Create a 3D effect \[Simple\]](#)

Controx - July 3, 2013, 6:25 pm

Difficulty : 1/10

Step 1:

You first pick the picture you want and color it. Then merge all layers, so it will be only one layer on your Layer palette.

Step 2:

Duplicate the picture. Click on the "FX" -add a layer style- button at the bottom of the Layer palette and pick "Blending Option" from the list

[img]http://media.tumblr.com/tumblr_ly4ek7AiLN1qarabx.png[/img]

Step 3:

A new window will pop up, go to the "Advanced Blending" , you'll find that all the three channels are being picked. You just click on R, so it's no longer picked. Then Click OK

[img]http://media.tumblr.com/tumblr_ly4el8P6uJ1qarabx.png[/img]

Step 4:

Now you have the two layers. Move the top layer a little to the right side, you will start to see the 3D effect. You can mess around and move the top layer even more

Finished Result :

Hope you've enjoyed this short tutorial!

MyLittlePony - July 3, 2013, 9:14 pm

Short and sweet how it should be.

Nice job.?

tolich94 - July 4, 2013, 10:37 am

Simple, short tutorial.

Thank you for showing this neat little trick :D

Vandalizem - July 4, 2013, 2:50 pm

thanks dude really helpful totorial :)

i'll use it !

Controx - July 9, 2013, 3:43 pm

Thanks guys, kind of new to this so I hope it helped!

Great tutorial man. Simple and sweet. Also it can be applied to many things like text for a sig etc.

Also, it's called stereoscopic effect.
