Hi HF! I am going to warn you all who loves RAT'ing, Keylogging etc because they need crypter to make it FUD their RAT's, Keylogger etc. I am here because I am sure that [Zetix](#) is [EncryptX](#) and he is using two accounts in here HF, its mean violation of HF. You know why because? See below:-

[EncryptX](#) Scammed Me \$198 via LR:

He was actually selling the [EncryptX Project Source Code](#). After I saw his thread then I purchased source code from him. Basically he scammed me, found detail [here](#).. After scamming, he even didn't reply in thread or didn't answer my PM as well and went gone offline for long.

Story Of [Zetix](#)

I know he is awesome guy because he coded .NET Crypter namely [Darknet Crypter](#) and hired [Lads](#) to resell his crypter here.

Interesting Points Of EncryptX & Zetix
Check Zetix Registration Date, its 03-25-2013

Spoiler ([Click to View](#))

EncryptX gave him +rep on 03-26-2013 (after few hours) since Zetix never even simple post in HF, interesting huh! Check out screenshot with date of +rep.

Spoiler ([Click to View](#))

EncryptX was start selling his crypter and after few days when he realized that no one buy his crypter except few one (even those are complaining that his features didn't properly work, check his sales thread [here](#)) then he tried to sale his EncryptX Project Source Code [here](#). Now the interesting point is, Zetix also tried to sale his Darknet Crypter Project Source Code, found [here](#) and check the interesting points again in screenshots.

Interesting Points In Both Sales Page:

Zetrix coded Darknet Crypter and after he is selling project version 1.

EncryptX coded EncryptX Crypter and he was also selling project version 1.

Both threads have same reasons why he is selling source because he is working on version 2.

That is why he is selling the source.

Both threads have refuding tools.

If you look closely, both threads have also uses same words i.e Both threads says, Start your own crypter business

Both threads says, Source Code, Guide, Refuding Tools

Zetrix says: I'm selling Darknet Crypter V1, I'm releasing V2 next week etc

EncryptX said: EncryptX Crypter V2 will be released in few days

Zetrix Extra Stuff: Refud Guide + Tools

EncryptX Extra Stuff: Refud Guide + Tools

Zetrix Says: I will sell 1 or 2 copy's depending upon the offers I get. I means, if I get high offer I will only sell 1 copy and if I get decent offer I will sell 2 copy's.

EncryptX also said: I will sell 1 or 2 copy's depending upon the offers I get. I mean if I get high offer i will only sell 1 copy and if i get decent offer i will sell 2 copy's.

Both threads have same payment methods and in sales threads of crypter as well.

And so many things which can be find out easily.

I PM'ed him (Zetrix) before I posted this.

Spoiler ([Click to View](#))

Well I will post also his reply via PMs. He denied again and again but at last he accepted and told me so what? How dare he? I am impressed. Well I am out of city atm and will post screenshots of PM's tomorrow. Ah! latest updates, just saw, he also scammed people again here too. Check [here](#)

ViRuS_DanGeR - July 4, 2013, 1:42 pm

???????↑? Thanks for the warning, and then I wanted to buy crypter,have to punish such hate when deceive people,I hope he return the money,sorry for my bad English

Ukem - July 4, 2013, 2:20 pm

I bought DarkNet, but it was only really fud for 1 day lol, then it went up to 6, 13, and now it's at 10-12 again but...

The first day I bought it my license didn't work. I had to wait for him to purchase more licenses so that I could use it. That took him an entire day and I really needed to use it that day. Once I got it, the crypter just kept on generating corrupt files that wouldn't launch stub and just take up 100% CPU. I asked for support at least 3-4 times and he kept on replying "make sure your settings are set appropriately etc.." I tried everything, I even reinstalled my Windows to 64 as I run 32 and thought maybe it had to run on a 64 bit machine.

After debugging for 6-7 hours he posts "oh yeah it's nothing with your machine it's just our servers are down."

It's an okay crypter, and it's worked for advertisement. But after that little hassle and seeing how shady he is here I will not be repurchasing.

sonictype - July 4, 2013, 3:16 pm

???????†? Thanks for the warning man

hijackersx - July 4, 2013, 3:18 pm

Good investigating skills. A shame you got scammed for so much. You shouldn't of been scammed at all.

Hopefully these two get caught out. Well.. These 2 are one person. :| Mindfuck

Thats is ok. I will speak to Zetix about this.

Ukem - July 8, 2013, 9:17 pm

Any word from Zetix mate? He was supposed to update the crypter today... Guess we won't ever be seeing him again.

GearCEO™ - July 8, 2013, 10:28 pm

Now Zetix (EncryptX) never update his crypter. He may offline for a along time. Now the process will start again as I mentioned in the first post.

lol just wait for someone to sign up in 10-12 days and try to sell a crypter. I wish mods could get involved. You could check his I.P. history at some point (for EncryptX & Zetix) and see what his real I.P. is and get feds involved. Sorry this had to happen to you bro.

Lads I suggest you start talking real fast as to what you're going to be doing. You were the one transferring all the cash to Zetix, weren't you? Holding PayPal cash for him. You can charge him back and offer us all refunds if you'd like, at least refunds where you still get the cut for your work & profit. Or else prepare to be repfucked & chargedback to helll.

I wont be repfucked. I will be chargedback however. I have done nothing wrong. I cannot get the money back from him as I sent it in BTC.

Don't get smart with me Ukem.

GearCEO™ - July 9, 2013, 1:03 am

Ukem its not Lads fault, he is just a PP holder. He don't know him. Zetix hired him as everyone do.

kambatta - July 9, 2013, 4:17 am

I am amazed there is no scam report on Zetix for Darknet Crypter yet.

3270 - July 9, 2013, 8:33 am

Wasn't there supposed to be an update yesterday?

DanteStigma - July 9, 2013, 8:45 am

It's not Lads fault, hes just on hes way to get money by doing business. Anyway i hope we get somehow chargedback :/ Damn... had so many things to do.

Ive checked crypter, yea still can access to it. Made an new RAT Server (DarkComet RAT) Crypted, send to bshades scanner, the crypter isn't fud, and not touched at all, only staying same on 6/35. Sometimes 12/35.

I hope we all get an chargeback. Omni have to trace his IP for scamming people twice. (Zetix, known as EncryptX)

EDIT: Still no clue about the V2 Update. No any news on the Crypter, nothing. The "Manual Update" function is fake i bet :S

GearCEO™ - July 9, 2013, 9:12 am

Zetix alias EncryptX ran away with your money guyz. Omni should ban both accounts.

AnzAkerman - July 10, 2013, 12:52 am

If I find Zetix's IP. I'm gonna inject two DDoSer's at his ass at the same time for 3 months. I'd hope that bastard can continue university at that rate. Just until I get his IP...

And Yes I Paid For DarkNet.

HaZarD. - July 10, 2013, 6:48 am

Fuck, seemed like a legit guy. The fuck man, I paid for darknet. Time for a refund.

Ukem - July 11, 2013, 2:54 pm

Lads maybe you should unlock the thread? And explain what's happening before everyone starts filing chargebacks on you.

Dr.Sloth - July 11, 2013, 4:59 pm

Doesn't look like a multi accounter. he obviously was friends with the other person

Ukem - July 11, 2013, 10:54 pm
