Thread: [SAFE MODE BYPASS-HELP!](#)

amosroy111 - July 4, 2013, 8:37 am

i just got shell from this website: [v18 shell undetectable link](#)

and everytime i rewrite the file it says cant write the file here is the screenshot of what im talking about :

[img]http://img829.imageshack.us/img829/2606/j832.jpg[/img]

and the upper is this: how can i upload another shell here without trigerring the safe mode:

[img]http://img713.imageshack.us/img713/5594/mu39.jpg[/img]

and if you upload or remove the safe mode please let me know.. because this game server has scammed players in philippines,usa and canada. so any help would be appreciated to deface this or remove safe mode something!

urez - July 4, 2013, 9:30 am

edit- guess i was actually wrong, sorry, removed

Coded Indisoul - July 4, 2013, 9:34 am

safe_mode = Off

disable_functions = NONE

open_basedir = OFF

right this code in php.ini file it will of the safe mode ! still need more help contact me on skype manjot511

amosroy111 - July 4, 2013, 9:55 am

can you remove the safe mode in this website so i can rewrite the files and upload another shell?? thanks . sorry to be spoon feed but i need to hack this game server badly!!

cheatson - July 4, 2013, 10:11 am

I have made a bypass for windows in C/cgi, you can get it off my blog (in my sig).

Dyme???????????? - July 4, 2013, 10:42 am

Posting the website you shelled public isn't a very good idea, if I was you I'd remove it.

amosroy111 - July 4, 2013, 10:44 am

i didnt shell it i just found that shell.. so im asking for help to deface it or hack it
