Thread: [\[RATE\] iPhone Messenger Application \[RATE\]](#)

NebulaStudios - July 6, 2013, 3:40 am

Hey guys, if you could give me an honest rate out of 10 on this one. I appreciate any feedback. Enjoy.

10/10 !! OMG LOOKS SO BEAUTIFUL

I want it

Kinda confusing that you cant really see whos typing what.

I can see its darker but you should move that "icon" to the other side.

It looks sick!! It could be better if you made the sender and receiver floating at different sides - like on the default iOS.

9/10

I would rate this 8/10.

The keyboard looks incredibly identical.

Maybe copy the line with the diamond shape to the other side and link messages from the individual users?

Other than that the design looks amazing! Great work!

This looks incredible, I really want to use it now!

As others have said, perhaps follow in other apps' footsteps and have the sender and receiver on different sides when they message.

The keyboard is identical. It's supposed to be the default Apple keyboard. Thanks for your feedback anyhow

It looks really clean, but like artifex said, we cannot see who's who in the conversation, you know?

Also, I think it doesn't fit with the Facebook original theme, you could maybe try to change the grey to blue? Idk.

Keep doing your work, that looks good! ^^

That was the first thing that popped into my head when I uploaded it. I'll change it around now. Thank you so much for your feedback!
