Thread: [Venom Spammer - Chat Spammer](#)

?range - July 7, 2013, 8:44 pm

This is my first program ever made. Please give me some feed back of what you think.

All it is, is a chat spammer. You enter in your message, click start, then click in any chat window and it will start spamming the set message you put. The spamming will stop once you hit stop.

Change the FormBorderStyle to something fixed because people can do that:

Also a Timer + SendKeys isn't the best method, but if this is your first spammer, it's fine.

Kind Regards ?

I can confirm that this is a safe tool and does what it is supposed to do. This is not malware. Good for your first release ;)

Needs to be faster, kinda slow. I could probably paste spam faster than that.

But, it's your first program, good job.
