Sir, that's exactly why we are updating. We just purchased advanced DDoS Protection and are adding a few other things to the client, and website, etc.

My review..

I wanted two accounts and talked to Discounts and added him on skype and the seller answered all of my 50 questions, sent the payment and was talked through how to set it up along with a guide and support. Just waiting on the actual files to apply the knowledge given to me.

OVERALL I WOULD RECOMMEND THIS TO EVERYONE AT THIS PRICE YOU CAN'T GET A BETTER DEAL.

just waiting on the files and will update once I have it working..

Edit.. Got the files going to configure now

Edit: Fully up and working HUGE VOUCH

I have bought the VPN manually from discounts, thanks for letting me purchase!

sinceko - July 16, 2013, 1:27 pm

A friend of mine asked me to help him finding a good VPN. I just looked around the marketplace, then saw the official group products and opened some threads. After that i found the extra section for VPNs. First of all this VPN is quite cheap, I mean 15 Dollars and you have a VPN for life. So i kept this in mind and looked around other threads. My friend thought this is nice, so I wrote OP a PN, and he answered very fast and was polite. We had some question, that were not so nice, like is it allowed to use it for 2 people, and the team stayed cool and answered polite.

Now to the VPN itself, as said this is cheap as fuck, the client is well structured, support is friendly, no problem while purchasing manually and he is just happy.

Trust me, this is P2P you are hidden. We will definitely be back online soon, cloudflare still updating and our name servers, it is taking awhile and we are frustrated but once our site is back live we will be spending 100's of dollars on new equipment for the VPN.

Yes, as of now it is only one. We have officially had our sites offline for 1-week and I am really frustrated. Our name servers, CF, etc. has gone through some problems but CF is now updating and our site should be up in no time, our VPN is still 100% Working, but it's just our site that is offline. You can only purchase manually is what that means for now.

I don't think it's automated. I have purchased the VPN earlier this morning, and I got the same message. I'm assuming someone has to manually setup the VPN account. I haven't received my login details yet.

Vouch for DiamondVPN. Speeds are great and fast. However, I did not receive my VPN instantly, it took about 8 hours and I had to send in a support ticket. All the locations are fast except for the Russian one, which I personally find to be a bit slow. Everything else is great, cheap VPN.

Shared IP means that the IP is shared with all customers who bought that plan. And the IP wont change unless we get new servers.

Lifetime is not 1 year but forever access to the VPN as long as it is up and working.
