Thread: [How to bind multiple files with WinRAR.](#)

Essolesso - April 10, 2010, 9:35 am

How to bind multiple files with WinRAR.

I was reading | .At0m. |s tutorial on how to bind files with WinRAR and someone wondererd how to bind more than 2 files so I decided to make this tutorial.

Hope its okey for him that i link to his tutorial because he was offline when i made this [Atoms Tut](#)

Step 1:

Start by finding the files you want to bind.

[img]http://img405.imageshack.us/img405/2527/step1q.png[/img]

Step 2:

Highlight them both and add to archive.

[img]http://img651.imageshack.us/img651/4056/step2lkd.png[/img]

Step 3:

Change the name to whatever you want and select "Create SFX archive"

[img]http://img233.imageshack.us/img233/4850/step3g.png[/img]

Step 4:

Go to the "Advanced" tab at the top and click on "SFX options"

[img]http://img217.imageshack.us/img217/7404/step4q.jpg[/img]

Step 5:

In the "General" tab type in the name of one of the file you want to run after the extraction.

[img]http://img3.imageshack.us/img3/1417/step5h.png[/img]

Step 6:

Go to the "Modes" tab and select "Hide all"

[img]http://img519.imageshack.us/img519/9239/step6.png[/img]

Step 7:

Go to "Update" and select Overwrite all files.

[img]http://img181.imageshack.us/img181/5901/step7.png[/img]

Step 8:

Go to the "Text and icon" tab and change the icon to whatever you want.

[img]http://img682.imageshack.us/img682/8348/step8.png[/img]

Step 9:

Click "OK" on the advanced window.

Step 10:

Goto the tab Comment where it says Enter a Comment manually write Setup="and the name of your file" but don't erase what's already there. You can add as many files as you want i think.

[img]http://img709.imageshack.us/img709/8546/step10.png[/img]

Step 11:

Press ok and it will create the file.

[img]http://img258.imageshack.us/img258/7899/step11.png[/img]

I hope this helps.

Much of the tutorial is the same as Atoms so credits to him.

Please comment and rate.

Thank you for this great and easy to follow tutorial great job

Entrepreneur - April 13, 2010, 11:15 am

Looks nice,

Nice contribution.

Bloods - May 16, 2010, 2:42 pm

i hop it works its a 200mb+ file to a 400kb file lets see how it go's

SmOKeR-HackeR - May 16, 2010, 3:47 pm

Great tut keep it on :D Thanks

-mothered- - May 16, 2010, 4:15 pm

Although this methodology has been wide-spread for a while, It's still very Informative, particularly to the unbeknown.

Good contribution mate :)

Clothar - June 12, 2010, 10:11 am

thanks for this guide. if my bot is fud nothing will get detected still correct?

goldenboy - June 13, 2010, 7:36 am

Looks good, I'll have to try it sometime, thank you.

Yes it will be fud if it was fud when you binded it.

Dom0107 - June 14, 2010, 7:43 am

very nice! i been looking for a binder this shall do the trick. :D

i must say, you are #1

"JUST WHAT I NEEDED" the cars

M.A.7_IIM - February 16, 2011, 10:26 am

thank u bro!!nice tutorials..

venom1616 - February 16, 2011, 11:37 am

verrry nice tut good sir you deserve a award!

3v0|v3 - February 16, 2011, 12:03 pm

Thank you for this tut, Have seen this method before but it is always nice to refresh it in peoples mind. Good Job.

danbirk - March 12, 2011, 3:30 am

Awesome tutorial but for some reason, i cant see the pic at the bottom with the final result.

You might update it m8.

This is very usefull ^^

XZQtr - March 12, 2011, 3:47 am

nice tutorial... thanx...

Mr.thinker - March 21, 2011, 1:24 am

Nice Tut... Thx For Sharing :)

danielmicu - March 21, 2011, 1:35 am

Thank you, found information in this tut which helped in other RAR processes.. :)

DeathEater - August 20, 2012, 1:49 pm

thanks for this, hope it help alot of people on here
