King Orca's \$harecash Guide

- [1. Register a \\$harecash account.](#)
- [2. Register a YouTube account.](#)
- [3. Download this simple screen capture program that is free.](#)
4. Go to <http://download.cnet.com/windows/>
5. Choose some programs that look useful / appealing, three will do.
6. Install and launch CamStudio and do the same for the programs you chose.
7. Record you using the program on your PC, showing features etc.
8. Video edit it with any program you have, Movie Maker will do.
9. Upload each one to your YouTube account. Put lots of appropriate tags and a good description with a link to the installer from your \$harecash account.
10. ???
11. Profit!

So, pretty simple huh? Rinse and repeat, eventually you should have 10+ programs up for grabs on your YouTube account and be getting 100+ \$harecash downloads a day. Have fun guys.

Spoiler ([Click to View](#)) Ok - if you feel the need to post "You only made this for referrals!", you can go fuck yourself. There are 0 referral links here, I just wanted to help out and show all the lazy fuckers of Hack Forums how they can fully utilize their \$harecash account with a method I use and wanted to share.

You are the guy trying to make \$10,000 by June 30th, right? Try this and post results, it works great for me.

IMO no one fills a survey to get a program that they can download online for free.

Yah thats why you need to do it with big files.

Example: Download the program (400mb+), put it into a password protected .rar file, put the password in a .txt and upload to sharecash, make another .txt saying "Download the password here: *SHARECASH LINK*" now most people will try to get the password, because re-downloading a 400mb+ program is a pain in the ass, and you got yourself some \$\$\$:D

But the hardest part is to get people to download your shit, especially with the new shitty youtube layout.

And to the other dude, i am doing something similar to that, but using porn :P more views, i uploaded 2 vids. yesterday and got over 300 views already :P
