Thread: [\[Guide\] How to protect yourself against skype resolvers\[NOT Working 10/2-13\]](#)

-ZYMOTOM' - July 9, 2013, 1:42 am

THIS TUTORIAL DOES NOT WORK AS OF TODAY, 10/2-2013

New:

This works with speedresolve, which is the only public resolver for skype that's currently working with beta(As far as I know).

Step 1: Get a Facebook account(Or windows live account, but I think that will expose your email and whatnot so it's kinda shitty, with this you will only see the facebook name, which won't really make a difference if you create a new one.). I'm going to assume you already have one.

Step 2: Spoiler [\(Click to View\)](#)

Step 3: Fill out everything and do whatever.

Step 4: Spoiler [\(Click to View\)](#)

Step 5: Spoiler [\(Click to View\)](#)

Step 6: Now you're done :)

Spoiler [\(Click to View\)](#)

Old tutorial which works partially.

Spoiler [\(Click to View\)](#) People seem to not know how to protect themselves, so I decided to make a tutorial.

This works even against skypebeta resolvers.

[spoiler]1. Download latest version of skype.

2.

3. [img]http://img812.imageshack.us/img812/8706/zzrs.png[/img]

4.

5.

6.

7.

8.

Done.

Now no one can resolve you through skype.

Note: The option for people to not be able to connect directly to you had to be set on each computer you use, and not on just one.

Cred to grabthatip.com, which I used to try to resolve myself.

Smoken Apple - July 9, 2013, 2:03 am

Great tutorial!

However, This will come with a loss that not new guys can contact you.

Is there any workaround other than this for the same?

Regards,

Smoken Apple!

Is there any workaround other than this for the same?

Regards,

Smoken Apple!Nope, they will have to add you before you can talk to them.

The direct connections alternative only works with chats, although it is suppose to work for calls aswell, but it doesn't, and that's how the skype resolvers now a days work, you call someone for like half a sec and then the IP it grabbed during that second.

LiteSpeed - July 9, 2013, 8:40 am

I just tried it.

Resolved me, took abit longer then usual but it worked.

-ZYMOTOM - July 9, 2013, 8:52 am

(Jul 9, 2013 08:40 AM)LiteSpeed Wrote: [\[CITE\]](#) I just tried it.

Resolved me, took abit longer then usual but it worked.Doesn't work mate if you have clean logs.

Try it on my other clean account, logged into it atm with those options.

"blazeitfgt42069"

w?rlockt - July 9, 2013, 8:53 am

Nice tutorial! I hope this will help against these resolving kiddies!

LiteSpeed - July 9, 2013, 8:55 am

Gotcha: <removed>

I can PM you the full IP if you would like.

-ZYMOTOM - July 9, 2013, 8:59 am

(Jul 9, 2013 08:55 AM)LiteSpeed Wrote: [\[CITE\]](#) Gotcha:

I can PM you the full IP if you would like.I think I know why this happened, I turned "Recieve IM's from everyone" on to prove something, what I thought would happen got confirmed, it was not able to get resolved, however, now it does :S

Let me try with a new one. And remove the IP please.

blue++ - July 9, 2013, 9:15 am

Thanks Oli, it wuurks for me.

huehuehue

frostytellem - July 9, 2013, 12:08 pm

Thanks this actually helped me out :)

Hazy - July 9, 2013, 12:11 pm

Does this also work if you also use skype on mobile devices?

y try it y - July 9, 2013, 3:00 pm

didnt know the call settings had to be changed, thank you.

brian188246 - July 9, 2013, 3:58 pm

I did this and when I tried to resolver I got
504 Gateway Time-out

So thanks a lot for the tutorial OP! :)

adheichi - July 9, 2013, 5:45 pm

Thanks for the tut, its actually helped me out :)

Benjamin Franklin - July 9, 2013, 5:48 pm

Even though I have been using Skype like this since the options came out, I still always log into Skype on a Proxy using Proxifier just in case someone on my contacts list tries to DDoS me.

Dagh0st - July 10, 2013, 8:32 pm

why we still using skypes backdoored guess everything is really

-ZYMOTOM - July 10, 2013, 8:40 pm

(Jul 10, 2013 08:32 PM)Dagh0st Wrote: [\[CITE\]](#) why we still using skypes backdoored guess everything is reallyYou don't know what you're talking about, skype isn't backdoored.

Fphoto. - July 20, 2013, 2:40 pm

Funny how SpeedResolve was under maintince when this was posted.

I own GrabThatIP, and its powered by SpeedResolve.

Give credits in the OP.

-ZYMOTOM - July 21, 2013, 4:46 am

Give credits in the OP.For what? Using yours to try it out? lol

If you insist, but what ever. It's a guide.

btw, before I "protected" myself I could be resolved, but after I tried it I couldn't.

VisionToAspire - July 26, 2013, 4:32 pm

Thanks Man, i needed this. i got this one really sketchy guy constantly trying to talk to me on skype. now i can hide my ip from him too.

NoneStar - July 26, 2013, 9:02 pm

great TUT, hope to see more like this c:

•Lucifer - July 28, 2013, 10:40 am

Wow thanks this really worked! no more skids tryna resolve myha skype anymore.

Knick0241 - July 29, 2013, 7:20 pm

Tried this and I stil'the can resolve me. I messed up with something?

-ZYMOTOM - July 31, 2013, 4:38 am

(Jul 29, 2013 07:20 PM)Knick0241 Wrote: [\[CITE\]](#) Tried this and I stil'the can resolve me. I messed up with something?This is kinda patched, they can still send you a file, and the request ALWAYS go through. So you're kinda screwed, but atleast calling you won't work.

Sir Michal - September 3, 2013, 9:24 am

Thats.... wow just wow I dont want to sound rude but that was bs. I can simply add the person then he wont be protected.

1nf3c7 - September 3, 2013, 11:48 am

I use proxies to hide my IP from Skype resolvers but I will be sure to try this.

-zYMTOM' - September 15, 2013, 9:38 am

(Sep 3, 2013 09:24 AM)Sir Michal Wrote: [\[CITE\]](#) Thats.... wow just wow I dont want to sound rude but that was bs. I can simply add the person then he wont be protected.Well no shit he won't be protected. Although, if people use a skype resolver they would not get through before. Now SpeedResolve has upgraded their standards to something I've not yet found a fix for other than proxy/vpn.

hutt132 - September 22, 2013, 10:44 pm

(Jul 31, 2013 04:38 AM)-zYMTOM Wrote: [\[CITE\]](#) This is kinda patched, they can still send you a file, and the request ALWAYS go through. So you're kinda screwed, but atleast calling you won't work. When they do that does it play the file failed to send sound? Because I randomly hear that sound sometimes.

-zYMTOM' - September 23, 2013, 3:37 am

(Sep 22, 2013 10:44 PM)hutt132 Wrote: [\[CITE\]](#) When they do that does it play the file failed to send sound? Because I randomly hear that sound sometimes.Yep, that's it. Although keep in mind it might be old transfers.

hutt132 - September 23, 2013, 5:55 pm

(Sep 23, 2013 03:37 AM)-zYMTOM Wrote: [\[CITE\]](#) Yep, that's it. Although keep in mind it might be old transfers.

I hear that sound all the time and it creeps me out.

KoDoD - September 24, 2013, 12:13 pm

Thanks for this ?

Working just fine here ?

-zYMTOM' - September 30, 2013, 3:07 pm

Thread updated, now protects against speedresolve(The only public skype resolver that works with beta.)

.Alerion - September 30, 2013, 3:09 pm

Vouch for this method, haven't been booted in months because of it.

-zYMTOM' - October 1, 2013, 7:51 am

(Sep 30, 2013 03:09 PM).Alerion Wrote: [\[CITE\]](#) Vouch for this method, haven't been booted in months because of it.Thanks. Although you're over exaggerating, you will not get booted by skids atleast, using my guide.

?????Thr????? - October 1, 2013, 6:59 pm

This method is actually outdated, as we've bypassed this as well. Enjoy HF users :)

-zYMTOM' - October 1, 2013, 11:05 pm

(Oct 1, 2013 06:59 PM)Thr??? Wrote: [\[CITE\]](#) This method is actually outdated, as we've bypassed this as well. Enjoy HF users :)"bypassed"

Handling a : correctly is so hard, right? So much bypassing to do.

Handling a : correctly is so hard, right? So much bypassing to do.

When live account integration was introduced, we added : support. We've been handling it for like almost 3 months now. That's not how we bypassed it :P
