Thread: [\[FREE\] All In One Scanner \[TCP AMP, DNS, and CHARGEN\] || Direct link in thread ||](#)

itzG0D - July 12, 2013, 4:34 pm

Hey there guys, so a friend of mine just gave me his scanner that he made and I thought that I would share it with the HF.

This is for the people who cant / dont want to spend \$100+ on scanners. It can scan for CHARGEN, TCP AMP, or DNS AMP lists.

<http://ge.tt/3ANjObl/v/0>

Feel free to use

Usage is in the read-me.

How to untar:

UNIX: tar -cvf s.tar.gz

Dependicys: nmap. ANY linux distro.

Have a nice day :)
