Thread: [Wasted \\$20 on Chronic Crypter..](#)

icheesy - July 13, 2013, 10:23 pm

Chronic Crypter is not working! DO NOT BUY.
I bought the lifetime package and I really regret it.

Anyhow, I'd really appreciate if I could get a free crypt from someone! I just lost \$20!
Spoiler ([Click to View](#))

PICTURE ^^^^

You can check my signature for a free crypter.
Or I can just crypt your file.
Send it to me via pm.

Gage8910 - July 13, 2013, 10:39 pm

Are you dumb? There will be downtime, it is a 20\$ lifetime crypter what do you expect? It will be up shortly

¹³³⁷ - July 13, 2013, 10:42 pm

the crypter is actually downtime.. it saying Connecting..

icheesy - July 14, 2013, 1:06 pm

It's still down.
Down for almost a week and I really do need a crypt.

Silentflow - July 14, 2013, 1:18 pm

Pretty stupid to make a thread about it :)
I bet the owner will suspend your account now.
The best thing was to pm him.

Reaper91 - July 14, 2013, 3:02 pm

\$2 and I'll crypt your server for you! My crypter has just as many options as Chronic and is FUD!

MaddieCarrot - July 15, 2013, 4:10 am

So did I! I spent \$15 on it and it never worked, I message him and he says his fixing it but it has been like this for days! And now they have decided to stop making it

ziocane74 - July 15, 2013, 5:02 am

it's unbelievable the number of people who get conned on hf.

And there is still Uber's and Leet's who tell others to trust the "known" sellers .

I am not a known seller but no one complained about my crypt service so far.

Buzzle - July 15, 2013, 5:05 am

This guy has a point.. It's kinda cheap

- **FIZIT** - - July 15, 2013, 5:07 am

I was thinking about buying it a week ago but instead bought Black Ops 2 unlock all, etc. Good thing I didn't. A few people were complaining. I don't know any good, reliable crypter on Hack Forums. They are all expensive and I don't feel like paying the same price as a RAT for a program to FUD my RAT.

Sigma - July 15, 2013, 5:15 am

Why don't you contact the admin of the crypter and tell him about it.

InspectorGadget - July 15, 2013, 8:18 am

You are probably missing an update and as such maybe connecting to an old server, contact the owner.

Leaving forever - July 15, 2013, 8:42 am

They already said in the thread they are working on it. (What I don't expect to be honest)
It's freakin useless to make a thread about it ???

Godroot - October 8, 2013, 4:04 am

well, the source code is was auction on hf..

icheesy - October 8, 2013, 3:33 pm

(Oct 8, 2013 04:04 AM)Godroot Wrote: [\[CITE\]](#) well, the source code is was auction on hf..
DOES THAT MEAN WE CAN USE THE CRYPTER AGAIN??

KyleWTF - October 8, 2013, 7:24 pm

Or just buy a more private crypter like WTFProtector.

Mace - October 8, 2013, 8:23 pm

Take a look at datascrambler, you can click on my signature
