Good luck

Hope you'll post something more than two screen shots with combobox
?

haha, im making a test video now :)

Flaaffy - July 14, 2013, 12:55 pm

i would advise converting to net 2.0 and possibly c# less dependancies

Sc?rf?c3_ - July 14, 2013, 1:26 pm

(Jul 14, 2013 12:55 PM)Flaaffy Wrote: [\[CITE\]](#) i would advise converting to net 2.0 and possibly c# less dependancies

what?? c# has less dependencies?? this is new to me... ?

Flaaffy - July 14, 2013, 1:43 pm

its more stable with lower net versions

Sc?rf?c3_ - July 14, 2013, 1:45 pm

(Jul 14, 2013 01:43 PM)Flaaffy Wrote: [\[CITE\]](#) its more stable with lower net versions

They are pretty the same, if the code is unstable is because of the coder.

The fuck are you talking about. C# and VB runs off the same framework - how is C# more stable, if you successfully manage to come up with an explanation as to why, I'll give you an icecream.

Sc?rf?c3_ - July 14, 2013, 2:46 pm

@Flaaffy

I'll give you an ice cream too... ?

c# uses the same librairies and compiler so how is it more stable???

?Mephobia - July 14, 2013, 4:55 pm

Will this also remove startup entries? Or would it just remove the files?

shan - July 14, 2013, 10:02 pm

Good luck ? awsOm keep working caus i need 1 xD

Forc?d - July 15, 2013, 12:59 pm

(Jul 14, 2013 04:55 PM)?Mephobia Wrote: [\[CITE\]](#) Will this also remove startup entries? Or would it just remove the files?

It depends, hopefully it will both kill the files and remove the startup key.

I would be really nice if i could get some kind of sample from different crypters, as i can not afford buying all of them :)

Forc?d - July 29, 2013, 7:50 am

Open for tester , please PM if you are interested

Kotei - July 29, 2013, 7:53 am

omfg It just is guize, gawd! ?

?YY? - July 29, 2013, 8:25 am

Good job coding this ;3. I'd like it more if it was something like rkill, where you just run it, and it does it all automatically then stops and closes itself.

This is One of the most amusing posts i have witnessed regarding c# being more stable. Less dependencies.

Forc?d - July 29, 2013, 10:29 am

Thanks!

It was originally the thought, but at the time being i don't have any stubs to go after. If i could get one stub from every Crypter/Rat/Keylogger on HF. And 2-3 weeks, that should be possible. Maybe in the future :)

ident - July 29, 2013, 10:41 am

Rkill is not a off the HF kiddy shelf application. Most of it's searching is "heuristic". It is a signature based rule set to kill procs and not a list of proccess names, though I it does contain few. For the most part it uses other types of signatures and regular expressions.

Frankstare - July 29, 2013, 12:26 pm

Dude this looks/seems awesome! If you need a tester count me in!

OneTXxL - July 30, 2013, 2:12 am

Veri nice job awesome application ,nice but project

Forc?d - July 30, 2013, 7:13 am

Currently having 2 people testing TN at this time.

goreuk2087 - August 1, 2013, 6:13 pm

good idea man, hope to see some updates

SomeAsianDude - August 1, 2013, 8:13 pm

OO, I'm going to download this for the heck of it. I want to see if I have any Trojans or Malware. Thank you.

Edit- Oh :c, its for sale and not for free and there's no download :c

Thank u! Updates are coming!?

RushFour - August 2, 2013, 12:51 am

It's not free? for how much you going to sell this for?

Forc?d - August 2, 2013, 2:24 am

(Aug 2, 2013 12:51 AM)RushFour Wrote: [\[CITE\]](#) It's not free? for how much you going to sell this for?
6 USD - 30 DAYS
10 USD - 60 DAYS
15 USD - 90 DAYS

Forc?d - August 9, 2013, 12:30 pm

Thread is somehow Updated with some new videos!

Drug ballad - August 10, 2013, 4:43 am

Im probably a retard but what is this exactly im sure its something cool.
but right now it just looks like a anti virus in my head

You are somehow correct by saying this is an AntiVirus. It is a software that is used to remove malware. It has no database like an normal anti virus. You simply choose the file you think may be a malware. and if you do find you after executing the file that it is a malware. Trojan Nuke will remove it. It is great for testing your malware before spreading , making sure that HF members don't successfully infect eachother
