Hello HackForums!

Today im releasing my 3rd program/release! This is my best one YET so that means there will be better ones in the future.

Ok here is a picture of the resolver.

It's working for me right now, as of 7/14/2013 10:37 PM EST

Before you report, I'm not advertising, I'm suggesting:

No one will remember a site like that, you can get a webdomain name right now for \$1.51 (for a year) at <http://www.crazydomains.co.uk/>

Make sure you use the UK site, the US site isn't doing this. Hope I helped!
