- 8) After letting it upload all your viruses your going to want to connect to as many HUBS as you can by clicking the globe button and left clicking on a hub name and pressing connect (from 100-200 as your RAM Can Hold)
- 9) Once your connected to as many Hubs as you can just minimize and wait until noobs start downloading your software,
Remember you have to have your server at least UD , if its FUD your going to get ALOT of slaves ?
The server has to be at least 2/33 to be effective in Apex because admins will kick you if they notice your file are infected. ?

- 10) If you made every things Correct After 30 Minutes you will have tons & Tons Of slave but remember you must be opening ApexDC++ for getting slaves.

Second Method (Torrents) :

- 1) You just dont need 100 site's where u upload your torrent's, need only good trackerlist & few interesting & working program's. Your .exe binded inside ofcourse. ?
And dont forgot crypt your .exe or use someone's crypting service.
- 2) upload your torrent to this sites :
<http://www.seedpeer.com>
<http://www.fulltols.com>
<http://www.torrents.sumotorrent.com>
<http://www.fenopy.com>

<http://www.monova.org>
<http://www.torrentbox.com>
<http://www.vertor.com>

then upload it to this major sites :

<http://www.#.se>
<http://www.demonoid.com>
<http://www.nordic-t.org>

3) Now seed your torrent's 1-3 day's to get downloads, then you can start whole process again with new program's ? .

Third Method (Chatting Sites) :
Things You Will Need :
some social engineering skills

- 1) open any chatting site but i preffer omegle.
- 2) See The Following Chat History And Try to Do Like It :
