About us:

Chaso Crypter is the most advanced Crypter of Hack Forums. We provide the best support for our clients. The files that get crypted with Chaso

can be undetectable for around 14 days. Chaso is coded in C#. We try to keep the quality of the product that's why we well be selling limited slots of 10. This is why our price is higher than other crypters.

Where did you get your copy of Albertinos rat? It's been dead for like 3 years.

LiveSupport - July 16, 2013, 1:14 pm

(Jul 16, 2013 01:11 PM)Citizen Snips Wrote: [\[CITE\]](#) Where did you get your copy of Albertinos rat?
It's been dead for like 3 years.

For tests I got most of them from another forum. Not posting as I don't want to advertise it + This was a private crypter before now we are selling slots.

iSynthesis - July 16, 2013, 1:25 pm

Well, considering you're here from 2009 and you have 7 posts on the coding section,
You're advertising your product as "the best on HF", while listing the most basic options as features,

And you're using the most used .net theme for the past few months,

You're proud of a feature that is public for 3 years (your hide process is probably darkfire.dll)

You bought this source / got it from someone, and you're tryin to make some quick cash,

Don't get me wrong, i'm not tryin' to trash your sales thread, not even close, just my humble opinion.

If you want this post to be removed just PM me, i'll remove it ASAP,

good luck with sales.

LiveSupport - July 16, 2013, 1:27 pm

WOW,

You are the biggest Moron I have seen in my life.

You Can say the crypter is coded from the same coder if both crypter has same Theme and a feature called anti-botkill but other 6 crypter on HF has that features.

From your post you look like a son of a bitch so should i make a thread for that.

!~The Guardian~! Son of a bitch?

LiveSupport - July 18, 2013, 7:25 pm

Second thing The Crypter is FUD But sometime the detection comes from the File you Crypt.

The Crypter is targeted to Crypt a Rat and Not a Loader. If you try to Crypt a File small then 40 kb then this 2 AV Gives the detection. Currently very less bots have small exe (Like: Ipkiller and Andromeda)

Just add a 40kb icon to your Virus and then Crypt and you will get a FUD Output.

This Problem Came with the New USG Added tomorrow and We are working on fixing it.

If you troll over here It wont help us to remove the detection.

This Problem Came with the New USG Added tomorrow and We are working on fixing it.

If you troll over here It wont help us to remove the detection. Anyone posts on this thread with problems well be black listed from support and ill try to find your account user on net seal and ban your account. You all have been warned. This is a sales thread not a help desk pm me with your problems.

SOULDRK - July 22, 2013, 7:19 am

In the crypter put other updates?

Kind Regards

LiveSupport - July 22, 2013, 10:26 am

Anyone want to ask any sales Q. Pm me I would be happy to help

?lanet - July 22, 2013, 2:38 pm

Please could you pm me your Skype or Aim name as i have a new skype.

Desty - July 22, 2013, 3:14 pm

It's better than most C# crypters on HF, because not being oversold yet. But 2 weeks is obviously not true.

Good luck with sales.

Sat-iva - July 22, 2013, 3:24 pm

I have this tool for more then a week now, tested on many bot as detail on the first post, and work great.

But did try on some oldies,like bifrost,assasin,optix,no luck so far ,they just dont work.
So for me this is the crypter to get,never got an other one who gave me 13 days fud time in a row.
Good luck with the sale
Sat-iva

Am online ready for anything pm me. Taking sales in perfect money and BTC

The Enforcer - July 25, 2013, 3:10 am

I vouch for this user legit and trusted !

ZombieAnon - July 25, 2013, 4:19 am

Legit as fuck. I fully vouch.

Setup my server with Imminent Monitor and used this to crypt it and scan came out 100% FUD.

Only thing I could ask to see added is a Extension Spoofer (only thing it is missing).

Thanks for being Legit

LiveSupport - July 25, 2013, 12:20 pm

Coiner - July 27, 2013, 10:16 am

Stub size?

One stub per customer or unique stub per customer, or USG on crypt?

How long it takes you to refud once detected?

Is output larger than input or smaller?

LiveSupport - July 27, 2013, 3:47 pm

We normally update it after 7hrs when it gets detected. Depends if where online.

Leaving forever - July 27, 2013, 3:53 pm

Coiner - July 29, 2013, 4:43 am

Is the small exe crypting not being FUD resolved yet?

I will use a 26kb exe that in future will shrink down to ~10 KB, its .NET. Will it be FUD using this crypter?

Also i am interested in your USG, is it just rename variables and add junk code?

LiveSupport - July 29, 2013, 7:35 am

no this is not allowed. anyone need anything pm me.

Elmomoh - August 12, 2013, 6:29 am

If I good understand your crypter can crypt a RAT to be undetectable from Anti-virus? Can we for example name our file with a "pdf" extension?

LiveSupport - August 12, 2013, 3:16 pm

(Aug 12, 2013 06:29 AM)Elmomoh Wrote: [\[CITE\]](#) If I good understand your crypter can crypt a RAT to be undetectable from Anti-virus? Can we for example name our file with a "pdf" extension?

To do this you would need a spoofer

About us:

Chaso Crypter is the most advanced Crypter of Hack Forums. We provide the best support for our clients. The files that get crypted with Chaso can be undetectable for around 14 days. Chaso is coded in C#. We try to keep the quality of the product that's why we well be selling limited slots of 10. This is why our price is higher than other crypters.

very impressiv crypter :D I recommend the purchase

BisualZ - September 4, 2013, 9:51 am

The most advanced Crypter, IN C# >.< with unique features like:

Silent infection - wow, I thought that malwares do what they do publicly.

Binder - I don't pay for a binder.

Mutex - whyy?

Advanced installer - what's the Oday method that it uses and it is s advanced? A batch file?

2 storage methods - native resources? EOF? Or managed?
