Please remove the ads, make the site look so unprofessional. How many professional companies do have ads on their site when they target stuff like this? If you are going to use ads use something else than AdSense, yes pays lower but it's more classy to trade spots with a similar website owner than to have AdSense.

Big fan of your work, Envira. Your website is stunning in the aesthetics. Will you be making themes for MyBB 1.8 when it is released?

Keep up the great work.

I've seen your work before on various occasions and I do like the ideas you put in them, although I do see many small, tiny mistakes throughout the design. I do see some spelling and grammar mistakes too, so you should fix that to look more professional. The portal is really unique for the MyBB software and forums in general, bringing custom designs from landing pages.

Cryptic™ - December 6, 2013, 8:35 pm

Vouch for Envira, I used one of his themes on my website in the past.

I am glad you liked the site, i have been constantly improving the design, so that users would love it more and visit more often.

Thanks mate,

Yeah sure, Tesla is one of the Modernistic Featured themes from MySkins. It took more than a month to code it, as it has lot of features. I crafted it very precisely every element of it so it stands out the best.

It is easy to customize too.

Thanks for your interest, we look forward for your purchase.

Looking forward for more sales of this awesome theme.

Already there is a dark release from MySkins.

Please check Vgame red and Tesla Dark.

The best Part of Tesla Dark is it can be customized into any color with a single line of code edit.
