Thread: [\[Build Error\] \[main.o\] Error 1 \(Makefile error\)](#)

A-MAN - July 16, 2013, 7:20 pm

I am using: Dev-C++ 4.9.9.2 on Win 7.

So I am working on this project. And whenever I come to compile it, I get a make file error. Its weird cuz all the other projects compiles correctly. And even when I come to copy some new short code replacing the original one, it compiles perfectly, which is making me more sure that there is some mistake in the code itself. First of all, here is the make file:

Code # Project: Project1

Makefile created by Dev-C++ 4.9.9.2

CPP = g++.exe

CC = gcc.exe

WINDRES = windres.exe

RES =

OBJ = main.o \$(RES)

LINKOBJ = main.o \$(RES)

LIBS = -L"C:/Dev-Cpp/lib" -L"C:/SDL-1.2.15/lib" -mwindows -lmingw32 -ISDLmain -ISDL

INCS = -I"C:/Dev-Cpp/include"

CXXINCS

= -I"C:/Dev-Cpp/lib/gcc/mingw32/3.4.2/include" -I"C:/Dev-Cpp/include/c++/3.4.2/backward" -I"C:/Dev-Cpp/include/c++/3.4.2/mingw32" -I"C:/Dev-Cpp/include/c++/3.4.2" -I"C:/SDL-1.2.15/include"

BIN = A-Engine.exe

CXXFLAGS = \$(CXXINCS)

CFLAGS = \$(INCS)

RM = rm -f

.PHONY: all all-before all-after clean clean-custom

all: all-before A-Engine.exe all-after

clean: clean-custom

 \${RM} \$(OBJ) \$(BIN)

\$(BIN): \$(OBJ)

 \$(CPP) \$(LINKOBJ) -o "A-Engine.exe" \$(LIBS)

main.o: main.cpp

 \$(CPP) -c main.cpp -o main.o \$(CXXFLAGS)

The compile log:

Code Compiler: Default compiler

Building Makefile: "C:\Users\user01\Desktop\A-Studios\C++\SDL\A-Engine\Makefile.win"

Executing make...

make.exe -f "C:\Users\user01\Desktop\A-Studios\C++\SDL\A-Engine\Makefile.win" all

g++.exe -c main.cpp -o main.o

-I"C:/Dev-Cpp/lib/gcc/mingw32/3.4.2/include" -I"C:/Dev-Cpp/include/c++/3.4.2/backward" -I"C:/Dev-Cpp/include/c++/3.4.2/mingw32" -I"C:/Dev-Cpp/include/c++/3.4.2" -I"C:/SDL-1.2.15/include"

make.exe: *** [main.o] Error 1

Execution terminated

The project files:

<http://pastebin.com/5BWq8iEJ> (main.cpp file)

<http://pastebin.com/p3ZjdS8A> (Object.h file)

What am I doing wrong this time ?_? ???

Thanks for your time and dedication!
