PHP Search Engine v1.2

[img]http://s2.1pic.org/files/2013/07/12/d5dbb94c58ba6029528b.jpg[/img]

PHP Search Engine Script allows your visitors to search for sites, images, videos, news and even more, using tens of filters available for all searches. Also the script uses Bootstrap framework so you can quickly change the design. Also the script have a live pagination implemented, it's cross-browser and cross-device compatible (pc, tablet, phone), and more!

Features:

Web, Images, Videos & News Search.

Search for .DOC, .XLS, .PDF & so much more...

Bootstrap integration, change the entire design in seconds!

Live pagination (no page refresh), no server load.

Safe Search feature (Off, Moderate, Strict).

Highlight the searched keyword in the results.

Open results in new tab (or _self) feature.

Various operands (like "site:codecanyon.net" or "link: codecanyon.net" and even more...).

3 Widgets available on the home-screen...

Option set the results per page up to 50.

Cross Browser compatible, mobile & tablet responsive.
