Thread: [Legion | Botnet, IRC Bots and Zombie Section Help Desk](#)

Cellulosic - July 17, 2013, 8:22 am

[img]http://i.minus.com/ieq6viOQ6szdE.gif[/img]

Legion Botnet Section Help Desk Here you may ask questions about IRC Bots, Botnets and everything relating to botnets, and will be answered by someone in the Legion.

After you ask your question, me or any other Legion members will answer them.

Ask away! :)

Please know comments made by members other than the support on this thread are not official and may be wrong.

My current status:

ONLINE

If I am offline, DO NOT PM ME. Post your questions here and I will answer them when I get online.

Skorp - July 17, 2013, 8:25 am

Hopefully this is better than the other help desk. ?

Skorp - July 17, 2013, 8:26 am

Some other "legion" help desk around here, too lazy to find it.

ada? - July 17, 2013, 8:46 am

I'll run Beta Bot on this server:

Quadcore Xeon X3220 CPU

8GB Ram memory

500 GB harddisk

1000 mbit unshared

What server OS should I run? CentOS 6, Debian Squeeze, Debian Wheezy, FreeBSD 9, Ubuntu 12.10, VMWARE esxi, Xenserver or Windows 2008 ENT R2.

Thanks in advance.

SpheX™ - July 17, 2013, 8:47 am

if you're refering about zeus, then it's against the rules.?

Brian Krebs - July 17, 2013, 12:49 pm

Which crypt do you recommend? Also, is PDF binding more effective than jpeg binding or not?

Coiner - July 17, 2013, 1:05 pm

Nice thread.

Hopefully now members in this section will be smarter.

FantaSec - July 17, 2013, 1:07 pm

(Jul 17, 2013 12:49 PM)Skyon Wrote: [\[CITE\]](#) Which crypt do you recommend? Also, is PDF binding more effective than jpeg binding or not?

Depends on the dependency of the bot, if it is a non dependent bot you would want something like Broad Crypter (200\$+), if that is out of your budget, get Absolute Crypter. If you have a dependent bot, Insomnia, or any other .NET software, Data Protector, or similar.

(Jul 17, 2013 12:49 PM)Skyon Wrote: [\[CITE\]](#) Which crypt do you recommend? Also, is PDF binding more effective than jpeg binding or not?

They can be equally effective depending on how you bind them or what you use to do so.

Thebeast123 - July 17, 2013, 1:23 pm

do you know any threads that can get me started with my own botnet also creating an irc server

FantaSec - July 17, 2013, 1:35 pm

Old tut:

<https://hackforums.net/showthread.php?tid=2653189>

And get ngr?

Brian Krebs - July 17, 2013, 1:35 pm

Thebeast123 I can help you with a setup. If you don't trust me because of my low posts that's fine. I'm just trying to help people

Coiner - July 17, 2013, 1:39 pm

(Jul 17, 2013 01:23 PM)Thebeast123 Wrote: [\[CITE\]](#) do you know any threads that can get me started with my own botnet also creating an irc server

You shouldn't use IRC Bots unless you want your bots stolen by someone like me. Not threatening, just saying anyone with Packet Sniffing knowledge can steal all of your bots.

HTTP Bots > IRC Bots and that is a well known fact, not on this board though.

Understalker - July 17, 2013, 1:45 pm

Before this thread takes off, please know comments made by members other than the support on this thread are not official and may be wrong.

Brian Krebs - July 17, 2013, 1:52 pm

OP you should edit the above comment into the main thread too avoid people complaining at you for someone else's misguided information.

Btw black array I agree http is better

Cellulosic - July 17, 2013, 2:04 pm

Btw black array I agree http is better

Done.

And also, HTTP botnets are much more secure. But, lot's of people still prefer IRC over HTTP for multiple reasons.

I personally like both.

Brian Krebs - July 17, 2013, 2:08 pm

I personally prefer http. I don't mind waiting for my knock if it means my bots can't be stolen by Cain and able haha

FantaSec - July 17, 2013, 2:11 pm

(Jul 17, 2013 02:04 PM)Cellulosic Wrote: [\[CITE\]](#) Done.

IRC is instant reply and shows the feedback, HTTP doesn't Dx.

Brian Krebs - July 17, 2013, 2:13 pm

You could make http instant just by setting the knock to 1 second or below.

Cellulosic - July 17, 2013, 2:14 pm

(Jul 17, 2013 02:11 PM)FantaŠec Wrote: [\[CITE\]](#) IRC is instant reply and shows the feedback, HTTP doesn't Dx.Yeah, I know. Thats one of the reasons why I like IRC. :)

FreeBSD 9 stripped down, that shit for server-side crap is boss.

Infinity. - July 17, 2013, 5:22 pm

If i were to start into this section, Which thread will i refer to it first? Like from everything from beginning.

Cellulosic - July 17, 2013, 5:54 pm

(Jul 17, 2013 05:22 PM)Infinity ? Wrote: [\[CITE\]](#) If i were to start into this section, Which thread will i refer to it first? Like from everything from beginning.

Depends if you are investing some money into the project.

If you don't want to discuss it on this thread, PM me or add my jabber.

SmileZ:) - July 17, 2013, 6:13 pm

This is an extremely noob question. So, I realize you access a IRC bot through, well, an irc. But with HTTP do you go to a website an control your bots through like a control panel type thing?

Cellulosic - July 17, 2013, 6:17 pm

(Jul 17, 2013 06:13 PM)SmileZ:) Wrote: [\[CITE\]](#) This is an extremely noob question. So, I realize you access a IRC bot through, well, an irc. But with HTTP do you go to a website an control your bots through like a control panel type thing?

Yep, you got it.

You use an IRC client to command your bots on an IRC bot.

You go to your website and command them from your control panel on an HTTP bot.

Sutorimu - July 17, 2013, 7:20 pm

(Jul 17, 2013 06:17 PM)Cellulosic Wrote: [\[CITE\]](#) Yep, you got it.

I hope you're not planning to get Athena HTTP. If you are, get Beta instead.

Yes its well worth it. If the panel is well coded, then no one can steal your bots. But when you use IRC - really anyone can steal your bots.

Sutorimu - July 17, 2013, 7:24 pm

(Jul 17, 2013 07:23 PM)BlackArray Wrote: [\[CITE\]](#) I hope you're not planning to get Athena HTTP. If you are, get Beta instead.

Well, im planning to get Athena HTTP for Stress Testing, i think BetaMonkey said that Athena is better for stress testing. Otherwise i just get BetaBot and have AthenaIRC and send it bots when i need to stress test.

What do you suggest?

Uzi London ++ - July 17, 2013, 7:24 pm

Vouche :) He helped me fix my botnet up.

Cellulosic - July 17, 2013, 7:25 pm

Paying for BetaBot is well worth it, the best bot on the market at the moment.

It tricks the user into elevating it's privileges and when the user does, it takes out over 30 anti-virus types.

It has a Ring3 Rootkit, I am pretty sure and is very hard to remove.

And has a formgrabber.

There's some BIG pro's with BetaBot.

Sutorimu - July 17, 2013, 7:26 pm

Alright, I'll be on in a bit.

Just kinda busy right now.

Hinshi - July 19, 2013, 9:19 am

I'll jump straight into it, since I have no need to act reluctant.

What is the difference (as a whole) between an IRC botnet and a simple "botnet", exactly? It's a simplistic question in nature, although I haven't found a concise answer yet. Moreover, if there are any other forms of botnets, what might they be, exactly?

I've also heard profoundly large IRC hits can cause your land-line (if you still run them) to call out to random numbers and shit. Is this mere myth, or perhaps it is grounded on a factual basis?

Brian Krebs - July 19, 2013, 9:26 am

Irc botnets communicate via irc http botnets communicate via http panel. Http is more secure but the tasks you send are not instant. I prefer http

Hinshi - July 19, 2013, 9:31 am

(Jul 19, 2013 09:26 AM)Skyon Wrote: [\[CITE\]](#) Irc botnets communicate via irc http botnets communicate via http panel. Http is more secure but the tasks you send are not instant. I prefer http
How do IRC bots operate within IRC "communication", though? Moreover, what exactly is an "HTTP Panel"? I know what HTTP is, although what might this "panel" be that you're referring to? Is it just another way to state "HTTP communication"?

Brian Krebs - July 19, 2013, 9:33 am

Irc bots use a irc channel to recieve commands. A http botnet uses a "website" to recieve commands

Hinshi - July 19, 2013, 9:36 am

(Jul 19, 2013 09:33 AM)Skyon Wrote: [\[CITE\]](#) Irc bots use a irc channel to recieve commands. A http botnet uses a "website" to recieve commands
Thank you for the technological information. I've given you a L33T present to illustrate my gratitude.

Brian Krebs - July 19, 2013, 9:39 am

Hehe thanks. I appreciate it. If you have any further questions feel free to pm me

Cellulosic - July 19, 2013, 9:44 am

Alright, although I have one final inquiry for the time-being, and it is as follows (it should also be relatively simple in nature): what is the difference between a web-based stresser and one that uses "shells"? I'm a bit rusty on my knowledge, as I'm quite sure I used to know at one point in time.

Cellulosic - July 19, 2013, 10:11 am

(Jul 19, 2013 09:52 AM)Qualia Wrote: [\[CITE\]](#) Alright, although I have one final inquiry for the time-being, and it is as follows (it should also be relatively simple in nature): what is the difference between a web-based stresser and one that uses "shells"? Well, you can shell something and use it to DDOS, and web based booters might very well have multiple shells that they're using to DDOS.

So think of it like, shells are the back-end and web-based booters are the front end, commanding the shells or their servers that they use to do the deed.

Don't take my word for it though. It is a myth, DDoS disables outgoing connections. Does not start them.

(Jul 19, 2013 09:52 AM)Qualia Wrote: [\[CITE\]](#) Alright, although I have one final inquiry for the time-being, and it is as follows (it should also be relatively simple in nature): what is the difference between a web-based stresser and one that uses "shells"? I'm a bit rusty on my knowledge, as I'm quite sure I used to know at one point in time. A web based stresser can use shells or API's, both have the same concept, however an API is owned for malicious intent (DDoS), whereas a shell is a script that is uploaded to hosts or sites with them not knowing and using their servers as DDoS power. The more, the stronger (based on server size, speed, and specs).

pstopman - July 19, 2013, 4:28 pm

`whats r irc bots, zombies, and botnets, please explain, what they do, and how u can make them

FantaSec - July 19, 2013, 4:35 pm

(Jul 19, 2013 04:28 PM)pstopman Wrote: [\[CITE\]](#) `whats r irc bots, zombies, and botnets, please explain, what they do, and how u can make them

IRC bot is the same as a zombie, a zombie is a bot, slave, ratted computer, infected computer, etc. A botnet is a network, or a lot of bots. You can use them to DDoS, steal accounts, log information, have fun with, stalk, and more. And you can't "make" them, you infect them with a virus, such as Blackshades, Netwire, Cybergate, etc.

pstopman - July 19, 2013, 4:39 pm

oh, okay, thanks, so to get a botnet, i would need to make a RAT / Virus, and infect a bunch of people?

That could be fun....

I just gotta learn to make a RAT

That could be fun....

I just gotta learn to make a RAT

Or use any of the thousands of bots, such as Andromeda, Beta Bot, Athena, Insomnia, etc. But basically, yes. And you don't need to make a rat, you can buy a rat, botnet, etc.

Theguardian - July 19, 2013, 5:50 pm

Im looking for a RAT that will record video when certain pages are visited. any help is greatly appreciated

Infinity. - July 19, 2013, 7:01 pm

Thanks a lot OP, You've been a great help in your PM , Vouch for this.

(Jul 19, 2013 05:50 PM)Theguardian Wrote: [\[CITE\]](#) Im looking for a RAT that will record video when certain pages are visited. any help is greatly appreciated

Wrong forum if you're looking for RATS.

But, betabot can do that.

(formgrabber)

Not a video though.

forexpro - July 19, 2013, 9:41 pm

What are the minimum requirements spec-wise for hosting an http botnet? I'm thinking of setting up betabot and would probably have less than 500 bots for the first while.

Also, in terms of bandwidth, would a 10Mbps connection be enough for starting out?

Cellulosic - July 20, 2013, 12:27 pm

Hmm, a little more bandwidth would be better.

hansbald - July 21, 2013, 2:38 am

I don't read the whole thread, what is your favorite free and paid IRC-Bot?

Cellulosic - July 21, 2013, 9:35 am

(Jul 21, 2013 02:38 AM)hansbald Wrote: [\[CITE\]](#) I don't read the whole thread, what is your favorite free and paid IRC-Bot?

My favourite payed bot is Athena.

I do not endorse any free IRC bots.

But, I would personally would just use a free HTTP or betabot, but if you don't have that much money, athena will do.

Violators - July 21, 2013, 9:52 pm

I want to start bitcoin mining.

Can you point me in the right direction, like what exactly do I need? How much money would I need to invest?

Thanks.

ada? - July 22, 2013, 7:31 am

My second question.

Could you guys share some ideas that would generate money with a botnet except:

Cryptocurrency mining

Sell installs, updates or loads

PPD / CPA

Adsense

DDoS service

Adf.ly

Sell hacked stuff (accounts, shells, rdp's etc)

Thanks in advance

Lil W?yne - July 23, 2013, 7:22 am

hey, I want to setup this botnet <https://hackforums.net/showthread.php?tid=1418263> and use it to bitcoin mine, but the thing I'm worried about is going to jail and stuff, if I only just bitcoin mine on the botnet will I be caught or will I be ok if all I do is bitcoin mine on it? like is it even against the law to own one or not? I just dont want to get in trouble if I decide to make a botnet and bitcoin mine and go to jail for it. Thanks for the help!

Brian Krebs - July 23, 2013, 8:00 am

The very second you hack a computer you don't have permission to hack that's a federal offence

Sutorimu - July 23, 2013, 8:02 am

He is correct.

I am online and ready to answer questions

Brawler HF - July 26, 2013, 8:52 am

How many bots would it take to takedown a home connection?

Cellulosic - July 26, 2013, 8:55 am

(Jul 26, 2013 08:52 AM)Brawler HF Wrote: [\[CITE\]](#) How many bots would it take to takedown a home connection?
It all depends.

How many are online
Where they are located
Internet Speeds
ect.

But, I would say... 100. maybe.

Brawler HF - July 26, 2013, 9:00 am

I didn't need a precise answer, hence the simple question, i'll work on getting 100 - 200 then. thanks

Cellulosic - July 26, 2013, 9:05 am

What is The Best Website to host your botnet?

Lil W?yne - July 26, 2013, 4:49 pm

hey whats a good free webhost to start a botnet on for a few weeks just to see how everything goes
I just want a webhost that would work, thanks!

Tokyo - July 26, 2013, 4:51 pm

Another question, what are good botnets?

Not HTTP botnets like Andromeda

Like IP-KILLER but free/cracked

Cellulosic - July 26, 2013, 6:31 pm

(Jul 26, 2013 02:37 PM)Sully™ Wrote: [\[CITE\]](#) What is the best type of client or botnet for a big botnet? Like 5k slaves? IRC, BShades, DC, or whatever. ThankS!

IRC or HTTP botnets.

You don't want: BShades, DC for any big ones.

(Jul 26, 2013 03:03 PM)StarBrust Wrote: [\[CITE\]](#) What is The Best Website to host your botnet?

Hmm, hostclub.me would work.

Offshore, ect.

(Jul 26, 2013 04:51 PM)BBasedGod Wrote: [\[CITE\]](#) Another question, what are good botnets?

Not HTTP botnets like Andromeda

Like IP-KILLER but free/cracked

You won't find any 'good' botnets that're free/cracked. uBot, and Andromeda (and others like these) are the best options.

drewkasp - August 23, 2013, 7:10 am

where can citadel be found?...or which is the best botnet as of now..any one with the right answers can pm me.

Thanks.

what is the best crypter for dark ddoser

z0neZ3r0 - August 23, 2013, 9:25 am

huhh i have few newbie question. I know answers are somewhere on forum but i cant find it.

1st. I read on forum differences about DDOS and DOS attack then i found some programs in thread in download section that is LOIC, HOIC and slow loris author say that is DDOS programs.

How can it be DDOS if i only send request from my computer?

2nd. DDOS is distributed so i need more computers. How u get it ? u use some programs to infect other or what? u spread infection same as darkcomet?

3rd. Can u give me names of these ddos programs if it exist?

4th. What is botnet? I read something on forum how i can understand that is network of spread bots which work like one.

5th. Why u use IRC in DDOS ??

6th. How u make IRC bots?

7th. Zombie is infected computer same as slave when we use RAT?

8th. Give me some useful tutorials, i dont use this to ddos sites i use this for educations... sorry on my bad english it's in learning proces. :)

I think this is better to post here then opening now thread for newbie questions. I am really thankfull for help

voivodpk2 - August 24, 2013, 12:02 pm

How to bind DarkComet to RAR , to autoexecure while rar archive will be open ?

Circlin - August 24, 2013, 12:06 pm

I paid for this about 6-10 months ago and didn't even let me boot people.

Cellulosic - August 24, 2013, 10:51 pm

Are there any open source or decent free Linux IRC bots?

(Aug 24, 2013 10:51 PM)Cellulosic Wrote: [\[CITE\]](#) I don't think that's possible. I am no RAT expert though.

Check out <https://hackforums.net/showthread.php?tid=3628150>

There's a .rar DLL exploit laying around.

Cellulosic - March 10, 2014, 10:39 am

(Mar 10, 2014 09:49 AM)G0dOf4ll Wrote: [\[CITE\]](#) Are there any open source or decent free Linux IRC bots?

There's a .rar DLL exploit laying around.

To be completely honest there is no decent free bots.

There is OK ones, but usually they use very public methods of exploitation and are easily detected even while under crypt.

Haven't seen many, you'll haft to do some looking-around to find those.

MrKoniieTroll - March 10, 2014, 10:50 am

Who created the Andromeda Botnet and also who cracked it?

Cellulosic - March 12, 2014, 11:28 am

There are multiple cracks, but the most prominent one is by The Old Warrior.

Sasha Grey - March 12, 2014, 7:33 pm

Which UnrealIRCd should I use to set it up on a vps. If you could can you send me the one you use.

chatter - March 15, 2014, 7:14 pm

Whats Dos Shells ?

how can i get it ?

Sasha Grey - March 15, 2014, 7:20 pm

Do you think you could help me setup my vps with UnrealIRCd. Every single time I try to use it it just wont work.

Hawqed - March 15, 2014, 7:41 pm

How do you setup a irc or botnet to ddos?

Cellulosic - March 16, 2014, 4:18 pm

(Mar 15, 2014 07:20 PM)DVOJ Wrote: [\[CITE\]](#) Do you think you could help me setup my vps with UnrealIRCd. Every single time I try to use it it just wont work.

Give some information, like VPS OS, UnrealIRCd version you're using, your error, etc.

(Mar 15, 2014 07:41 PM)Hawqed Wrote: [\[CITE\]](#) How do you setup a irc or botnet to ddos?

This question is even too broad to answer. Just look at my previous answers and other threads and you'll figure out.

(Mar 15, 2014 07:14 PM)chatter Wrote: [\[CITE\]](#) Whats Dos Shells ?

how can i get it ?

A shell is malicious code put on a web-server to edit/delete files or other functions.

DOS is Denial of Service (attack) which floods the server(s) with information that prevents the servers from functioning correctly.

DOS + SHELL = Hijacking the web-server to run DOS related floods.

Sasha Grey - March 16, 2014, 10:37 pm

Can you help me setup my IRC please?

CryptexSecurity - March 21, 2014, 8:32 pm

Can any one here help me set up a IRC Botnet i have a pma exploit as well.

S a i n t - March 22, 2014, 11:27 am

Yo i was wondering what is a good irc bot that is out right now

?ain - March 22, 2014, 12:54 pm

Where's a good place to learn about how to shell a site, how to root a site after shelling, how to go from shelled/rooted server to IRC, etc?

HellaCrow - March 25, 2014, 4:16 pm

How would one create some bots that like or follow people. I mean does this use virtual machines for each bot or do you have to have other computers connected that you can control to create a program like that. I am very sorry if this is a noobie question. I know intermediate java and I want to learn how this works.

Legit Hackz - March 25, 2014, 7:46 pm

<https://hackforums.net/showthread.php?tid=4091369>

OpenProject botnet will work on Linux ..

Just get a webhosting server installed on the system with php... You can download that here.

<http://www.apachefriends.org/download.html>

Once you have xampp server installed on the Linux system place the php files from OpenProject in the xampp www folder...

Edit the botnet host.txt file and compile to a zip use a zip to exe converter and send to target...

The botnet will only infect and work on windows systems... But you can still use it from a Linux system.

Note if you go about doing it this way you will need to port forward xampp server past the firewall and modem/router.

ANON RetryR1 - March 27, 2014, 10:05 am

Hallo at All

im new interested in botnet using

I wanna use a Purchased Software and Botnet

i wanan get Features

-Mining

-DDos Single Target / Person Small / Medium Site

-The Plasmas Features are Looking fine but ive Read 50/50 good an negative thigs about the detection rate is a problem there

Which is a Good Priceworth botnet to start with ?

also interested ind Rat and dont know whats better PlasmaRat or Http Botnet

Rat Looks Great Interface i watched the Review and imma sure this one wold be Great does it give something more Powerfull i Think Around 70\$ isnt the hardest on Target Hitting(DDoS)

i will be happy if someone can come into my chat and help me out pls use HF nick then i can view who im writing with

<http://bossmode-hosting.de/BossChat>

Greetings

Plasma, Athena are good ones to use for the beginning. If you're not looking for a large amount of clients, a RAT would be beneficial too.
