Thread: [How To Trick Your Victim](#)

Vaxorr - July 18, 2013, 6:31 am

In This TuT. we will trick our victim to open our server file [align=left] firstly you must download these files :

- 1) Razor Spoofer : download from [here](#)
- 2) Text File Ico. : download from [here](#)
- 3) vuclan's Changer : From [Here](#)

Firstly Make A New Folder And Put Your Server File In It :

then change your file icon with vuclan's icon changer to the text file icon :

then after you changed the file icon spoof it to "txt" extension with Razor's File Spoofer :

Then click spoof and check its name to be like this :

go to your victim and tell him to see this paypal accounts so he will be tricked by its extension and icon.

?

feel free to tell me your opinioun .

I think this could work if you were targetting 6 year olds ! :p

Thank you for taking time and writing this tutorial for us !
