Rxck - July 18, 2013, 2:56 pm

Hey guys i wanna buy a booter and i dont know which one to buy. Can you please help me decide which one is better :)

Thanks

If I were you, go with reBoot. It has two hour attack times and has a dedicated staff to manage it.

Please supply sufficient proof otherwise stop trash talking my product.

reBOOT would be your best bet, the project won't be going anywhere for a long time.

I wont suggest my own stresser since he want ro choose from those two. Personally i can vouch for Joey and his products.

I would go with reBOOT.

Kind Regards

Just saying my opinion here.... But, being up for 8-months doesn't necessarily mean the booter is stable and works properly. That means that you couple be up and working half the time, but bullshit to your customers the rest of the time.

Anyways, OP was asking between two stressers, not yours.

I would definitely go with reBOOT, the owners run a stable and well working booter, it'll make everything go down that you need, I assure you. Also, both of the owners are quite trusted throughout here on the forum, and I've never heard Neon Stresser.

You seem to like it just fine, seeing as how you've ran over 60 attacks. We can always close your account if you'd prefer that, though.

And this is why you shouldn't buy Reboot, I'm guessing they cannot take negative opinions.

I would go with Masterboot or BigBangBooter, I tried reboot and it didn't knock nothing down when i bought it.

GO with Neon Stresser. Just because it has Neon in its name.

Legion stresser is crap lol go with deadlyboot.net for sure stronger and better and more up time than powerstresser or bbb. deadly boot has the best support and power now

Lol at everyone advertising their booter in here. How much does it cost these days to have someone do a vouch for you, Joey & all those others?

I used the searchbar to find some members that run Reboot. I was wondering if you can look at the ticket I made on user: Koolkoolkool.

(don't have enough rep to PM yet)
