I would like to highly vouch for this user just yet again,

The reasons towards me doing so is simply, and out of the will of my heart. I am so thankful for such a cheap yet professional and good quality host. Not only 5 minutes after paying you receive your new fresh VPS(Windows or Linux) but you can upgrade or renew any-time within your VPS period, and without any stress ExiNetworks is there to help with problems or questions that may occur.

Although my past experience made me unsure about whether to go with them, I was supported with a test VPS so I can check there flawless hosting, they gave me a test VPS with the plan I am with at the moment, and not only was that VPS fast, but SUPER fast.

I can honestly say, without any doubt, you can earn your money back so quick with these guys.

They also have such an epic referral system, were if your refer a new purchaser you'll receive specials to your chosen VPS(Extended time,extra hard space or RAM), without any doubt this is such a flawless way to bring in and keep customers.

I can now end with a pleased quote from me
Quote:Your services, not only brang a fresh new beginning for my businesses/services, but a new life and epic speed. And starting to securely host Private Servers without fear of DDOS. Flawless and efficient hosting, right in front of you!

about the port speed: does it mean for a 1GB/s line that you can:

upload at 1gbps when not downloading, download at 1gbps when not uploading, and download AND upload at the same time at 500mbps

Could you give me an equivalent of 2 cores in PC-terms, for example 2 core equals intel due 2.00 ghz.

If pay for a lite package now, and for a bigger package next month, can I keep my personal VPS or can I only get a new one?

Huge vouch for Black Lotus. Best customer service in the biz. Just renewed my license <3

Gigo - October 19, 2013, 4:40 am

Vouch! Great member and his products are fantastic.

IntegrateX - October 23, 2013, 11:52 am

I contacted you using the online contact form asking for support a few days ago, but no response yet :(

Can't access my server.

IntegrateX - October 25, 2013, 3:35 am

I've been waiting for four days, still don't have received any support and still can't access my server...

If I don't get any response in the next few days, I'll issue a complaint on Paypal.

I want to apologise, I couldn't acces the server because of a misconfiguration on my part.

The server seems fine, good r/w speeds (40-50 MB/s copying a file) and good up/download.

Bought VPS from ?I?c? L????.

Vouch for legit seller, fast and quick support tho! :)

DINEROMASTER - October 30, 2013, 1:27 am

said you were gonna install windows7 because my VPS keeps disconnecting, now my IP's are unable to connect to and you are not responding?

Everything was settled. Great customer service! Will be buying again. Thanks, sometimes i forget people are busy outside the internet :p

IntegrateX - November 2, 2013, 12:52 pm

Why are you ignoring my pm? I hope to hear from you.

DINEROMASTER - November 4, 2013, 12:05 pm

hi can you please message me back on skype? I am jonny, you haven't gotten back to me about my modification for a couple days now

IntegrateX - November 5, 2013, 7:38 am

I haven't heard from you for 10 days, which means I already waited +/- 15 days this month in total for support. Could you either refund or offer support and compensate for these 15 days? I respect people having busy lives, but if you want to do business, you need a minimum of engagement.

If you continue to ignore me, I'll have to open a dispute. I hope you understand.

I bought a VPS from this website Exinetworks.nl (<http://wdmsh.nl>)

Not bad ...Fast,stable good price !!

thank you for this VPS

--

I bought a 1 week ago VPS from this website
<http://wdmsh.nl>

and now I can't make connection to VPS ,I have sent messages to this website but no respond .

I wait now 3 days for my VPS

VPS is very good but support sucks

--

I wait now 4 days for VPS connection but nothing.

This guy is a scammer.

Hello, I was talking to your support on skype, and he promised me that he would restart my subscription time from when he installed windows 7, which solved the problems because i was unable to use before that, and also getting rid of 1 of the servers the .17 and adding on another month to the .15. But today i received an invoice on expiring, did you he not change it?
