Thread: [Re-size Image v1.0.3](#)

Gambino - July 18, 2013, 9:30 pm

Script Name:Re-scale Images

Description:Allows you to re-size an image based on a percentage. The larger the percentage the smaller the image. HF Limits the size to 999x999; my script will keep shrinking the image until it is below 999x999 resolution. Shrinking animated images do not work and will not work in future updates.

If there are any bugs please let me know.

Changelog:1.0.3 - Changed button position so it doesn't break the editor.

1.0.2 - Now works with Firefox. Added the ability to add a url to your image (const ENLARGE)

1.0.1 - Script created

Gambino - July 25, 2013, 6:15 am

1.0.3 - Changed button position so it doesn't break the editor.

Jeremy Corbyn - July 25, 2013, 7:09 am

I think I might use this from time to time.

Thanks OP!

'Snorlax - July 25, 2013, 7:11 am

Very nice! Now I don't have to take care of the size in pixels ;)

Nice share.

Nice share.

Thank you.

If there are any bugs, please tell me. Any suggestions are welcome! I'll be working on my Chrome extension today since I have all my IDEs installed.

'Snorlax - July 25, 2013, 7:19 am

Chrome Extensions are a pain in the ass. It's HTML and Javascript, but it doesn't work like that. It's so... weird.

(Jul 30, 2013 11:22 PM)xadamxk Wrote: [\[CITE\]](#) I'm in love with userscripts.

Mind if I add this to my Userscript compilation, located via signature?

No, I don't mind you doing that. ?

This is going to help so many people with images, good work Gambino.

Mung - *August 25, 2013, 5:10 am*

Soo much help for so many people....
