ColdSI is not using any of HostCookie/CloudVPN servers.

We are using our own dedicated servers. Right now for VPN's we just have USA and Netherlands. We will add next week 1 French server for VPN's also.

Yes Sir no logs.

The 3\$ is just the dedicated IP. You have to add the price of the vpn also.

So if you are paying 1 month, it's 5\$ + 3\$ = 8\$/month.

When connecting to a VPN, the speed always decrease Sir.

It will depend on your ISP, the distance from where you are to the VPN server you are connecting to and some more factors.

The only way you'll know is using the VPN.

Try to buy like 1 month and do a test. If you like you can continue, if you don't you leave. ?

One of the things we are changing is the protocol we use on the VPN servers.

We were using TCP for the time being but we are changing it to UDP, so expect a considerable increasing of the speeds ?

eCoLoGy - October 30, 2013, 3:08 am

Ok guys!
So many of our customers have been asking "Why is it taking so long for opening ports?"

You're right!
This October month was awful for us.
All the problems came at the same time so I had lots of problems to solved.

You can check the full explanation here

<https://hackforums.net/showthread.php?tid=3595962&page=19> in the WebHost post.

As I explained on that post, we had some problems with our Hard Drives that had to be replaced, a server that was suspended because of a client hosting illegal things and a partnership with another company, that is still on progress.

It's not an excuse but I really had my hands full this October month.

Anyway all the problems had been solved so today until the weekend I'm dedicating my full time to open all the clients ports and attribute the dedicated ip's you've bought.

Also, as I referred in the webhost post, I'm giving a full free month for the delay of the services delivery and setup.

If you're a VPN customer, you'll get a full free month of service until the weekend.

If you don't receive yours, until then, please PM me or send a ticket asking for it.

That's it guys!

We're back on track.

Time to work now and start opening the clients ports and attribute the dedicated IP's ?

eCoLoGy - November 3, 2013, 12:53 am

I understand Sir but as I explained before we are having many customers and most of them want
portforward. As a result of opening ports on the shared ips, many clients were asking for ports that
were already in use by other customers so we couldnt provide them those ports.

So the best and only way to have a high quality service with portforward is to provide it for
dedicates ips.

This is highly recommend also because with a dedicated ip, the customer can open all the ports he
want from their client area without having to ask by ticket to open ports and so there are no waiting
time for it.

Hope you understand Sir. ?

Right now, no.

But if you can wait until middle of January there will be an Australia and a Sweden server. ?

Well then middle of january won't be \$20 for lifetime lol, so I'm after a VPN Lifetime AUS Server as we speak, currently use OpenVPN they have no lifetime subscription and they are quite expensive.

If you are not in a hurry, you can buy the promotion of lifetime right now and use the servers we have.

In January, when we add the new servers, your client will get the update and so you can also use the AUS server at that time. ?

I shall be using the VPN for gaming, so I can't really use the servers you have provided as I will be lagging to the shit with +200 ping.

I'm sorry for the inconvenience.

I understand.

Sorry that we can't be of help right now.

Stay tuned on us in January if at that time you still need this ?

Kind of going slow right now.

Tried all the servers, fastest (France) went 2.5Mbps, with a 95ms ping. Ukraine didn't appear to work at all.

My internet without the VPN is 57Mbps, with a 15ms ping.

Might be because of the influx of new customers due to the lifetime sale, but. Just reporting my current experience.

Finished the VPN servers update.
All the servers are using UDP now instead of TCP.
You'll notice the speeds of them all are now much better.

This is the last day of the LifeTime promotion guys!
Get it while you can ?

The coldsi website isn't working correctly.

? ????I ? - January 8, 2014, 9:42 pm

The billing part of your site is not working correctly.

Code Site error: the file /home/coldsi/public_html/support/cart.php requires the ionCube PHP Loader ioncube_loader_lin_5.4.so to be installed by the website operator. If you are the website operator please use the ionCube Loader Wizard to assist with installation.

We've been doing an huge maintenance on our webhost server.
It's now working and fixed.
If you have any problem you can now open a ticket.

I still cannot reset my password, this is extremely frustrating for me as I have purchased lifetime VPN. Yet I cannot login to my account, as I have forgotten my info.

Ok guys sorry for the downtime but we have some big news for all of you.
We are merging with another company and all the services, servers and everything will change for better.
All our customers will keep their services and will receive free time for the downtime.
I'll have this topic closed while we are in the change process.

Thank you all!
