Thread: [\[MyBB Plugin\] RefLog - New Referral Logger \[MyBB Plugin\]](#)

v?x? - July 20, 2013, 1:42 am

I had this plugin privately coded for me a while back and as I'm no longer running any forums I feel it's time that this be put out into the open! This referral log is much different to that of the public referral log, and is very similar to HackForums Referral Plugin (it doesn't tell you if the user has activated). I've cleaned up a lot of code and made some edits. Baring in mind this is only in the version 1 stage. The UI may look good depending on your theme.

So here's my release of it. You may use this software under the GNU Public License. If you have any problems, please let me know!

Download:

<http://www.multiupload.nl/QHVQ69737L>

(WORKING AS OF 01/03/2014)

(PM Me If The Link Goes Down)

How To Install:

Upload RefLog.php to the /inc/plugins folder. Then activate the plugin via the ACP.

You will now need to make a template edit.

Go to: Templates & Style > Templates > Your Theme > Member Templates > member_profile_referrals

Replace this line:

Code `<td class="{ $bg_color}">{$memprofile['referrals']}`

With this:

Code `<td class="{ $bg_color}">{$memprofile['referrals']}{ $RefLog}</td>`

Now go to your profile and check it out! Please let me know how you get on with this plugin. I will hopefully be making updates to this regularly.

Is anyone using this? I was wondering if it's worth updating this plugin or not.

Red™ - December 28, 2013, 2:11 am

I tried downloading it but it says the file doesnt exist...
